1851.
INTRODUCTORY.

In presenting this edition of our Catalogue to the public, we return our thanks to our many customers and friends for their very extensive and constantly accumulating favors. We have been thereby encouraged to make large additions to our Nursery grounds, and to erect a Green House establishment not equalled in extent and completeness of arrangement by any other like concern in the State; thus connecting, with our hitherto almost sole cultivation of Fruit Trees, the elegant department of Shrubs and Flowers. The increasing demand for articles pertaining to this branch of our business, will be met by us in constant exertions to secure, regardless of pains or expenditure, every thing that is estimable either for its rarity, its beauty, or its intrinsic worth.

Our grounds now embrace over 100 acres entirely devoted to the products of the Nursery in their various stages. Our Propagating House is a fine span-roofed building, 17 by 50 feet in dimensions, and constructed upon the most approved modern plan. The Green House, also span-roofed, 25 feet wide by 117 in length, erected with an eye to the purposes for which it is designed without regard to its cost, is a structure of its kind, unrivalled for its beauty, capacity or convenience. These houses are now fully stocked with the choicest collection of plants that can be procured either at home or abroad. We are enabled, therefore, to offer to the public every thing in the line of our business, whether of the Fruit or Ornamental department; and all, too, of an excellence unsurpassable in the points of beauty, vigor, and luxuriance.

Connected with our Green House we have laid out ornamental and specimen grounds which will at all times be free to visitors. The superintendence of this part of our business, being under the immediate direction of our Mr. Fahnestock, he will at all times be happy to wait upon those who may favor us with their calls, to exhibit whatever may be worthy of their attention, and to give them all desired information. Having entered with earnestness and zeal upon the prosecution of this department, our importations of the new Evergreens, Roses, Green House Plants, &c., have already been, and will continue to be, very large. The grounds now appropriated, and closely planted to these productions, are nearly four acres; and we say with confidence that no like establishment can produce a more extensive and choice collection. The greatly reduced prices of many of these articles, as compared with other catalogues, will not fail to be observed by those who are preparing to make out their orders.
Having for many years been exclusively engaged in the cultivation of Fruit Trees, we have naturally had large opportunities for observing the peculiar qualities of various fruits, and of determining by careful comparison what sorts are most worthy of cultivation. Constant examination of Fruits grown upon our own grounds, and those of many valuable collections in our own immediate vicinity, to which at all times, we have free access; and also of the hundreds of specimens which from time to time have been submitted to us by partial friends, has afforded us, in part, the opportunities of which we speak. And we have availed ourselves, too, of the wisdom which has emanated from year to year upon this subject from our Pomological Conventions—reserving to ourselves always the right, however, to approve of their approval, or to condemn their condemnation of a fruit, as appeared proper in our own deliberate judgment—never conceding the opinion of a few individuals embodied as a committee to be infallible, nor by any means, thereby, more specially worthy of respect than that of the same number of equally intelligent men formed without the formalities and authority of a Convention. Our Catalogue therefore will be found to contain the names of several fruits, every way worthy of extensive cultivation, and justly popular wherever they are known, which will not be found in the Catalogues of those who accustom themselves to look with the eyes, and think with the brains of others. The knowledge of the merits and demerits of fruits thus acquired, is always available to those of our customers whose callings have directed their attention more particularly to other subjects; as it is our pleasure at all times to recommend to such persons such selections as we best know will be for their interest and satisfaction. Purchasers doubting their own judgment, therefore, may always rely upon our giving them, faithfully, the full benefit of our experience whenever they prefer to leave the selection of varieties to us.

In calling the attention of purchasers more particularly to our productions, we would inform them that, of both Standard, and Pyramidal or Dwarf Pear Trees, our stock is extremely large, and abounds in specimens of great vigor of growth, and beauty of development. We have them in great variety, from one to four years old,—many of the latter description being now laden with fruit. These trees, in large quantities, we will supply at very low prices.

Our stock of Apple Trees is most extensive, embraeing every thing sought for by the orchardist or amateur; and in size and quality these trees are unequalled by those of any other Nursery with which we are acquainted. Our aim has always been to send out none but the largest and best. We have also Dwarf Apple Trees of the usual varieties cultivated in this form.

Of Cherry Trees, both Standards and Dwarfs, we have a very large supply of all of the most popular and approved kinds, which we can sell to extensive purchasers at the most reasonable rates. These trees are of remarkable thriftiness and beauty.

A word to purchasers of Dwarf Trees. In order that they may be trained to the entire satisfaction of the buyer, whether as pyramids, espaliers, or low-standards, it is better to procure them when only of one year's growth. At this age, generally, the side branches are not formed, and the future symmetry of the tree is not liable to injury by the various risks of packing and transportation; but when received it is in a condition to develop itself in full perfection, when it can be operated upon as the fancy of the amateur may direct. Trees of this age range from about 3 to 5 feet high, and it will be perceived that the price is materially less than that for older trees.
Our supply of Plum Trees and Peach Trees is always kept full; and we are careful to obtain, at the earliest moment, every new kind of either which promises to be desirable.

Ornamental Trees for street borders and lawns, marked by the vigorous character of the general products of our Nurseries, are extensively cultivated by us and furnished at low rates.

Our list of Roses, and Ornamentals in general, will be found eminently worthy of attentive examination.

Our location, in the Central City of the State, through which the Albany and Buffalo Rail Road, and the Erie Canal pass; and from which the Oswego Canal and Rail Road proceed, and Plank Roads radiate in every direction; with a ready access also to the New York and Erie Rail Road; gives us unequalled facilities for the transmission of packages to every part of the country, whether distant or near.

Our Office, Green Houses, and specimen grounds are situated on West Genesee Street, ten or fifteen minutes walk from the Rail Road Station and Packet Boat Landing. An omnibus, starting from the Syracuse House, passes our door every hour in the day.

The personal attention of the proprietors is strictly and closely given to the business of the concern, in all its various branches; and we claim for our establishment, therefore, a correctness in the details of its operations that may be relied on by our customers as nearly infallible. Our soil being prepared the year previous to planting, by thorough manuring and cultivation, our trees acquire thereby a rapid and sturdy growth which we take great pride as well as pleasure in inviting all, who feel an interest in the superior result of high culture, to witness. Sojourners in our city can thus perhaps agreeably dispose of a portion of their time; and Nurserymen and others, who may wish to purchase largely or otherwise, can thus acquaint themselves with the quality and prices of our productions,—sure we are, that in these particulars we shall offer persuasives not easily resistible.

The usual periods for transplanting with us, are from about the middle of October to the first of December in the autumn; and from the last of March to the beginning of May in the spring. Trees for the South and West should be forwarded in the autumn. The uncertainty of the time of opening, of the buds, and of the Lakes,—the one often early, the other often late—renders this consideration important if not imperative.

All trees, plants, &c., sent from our Nurseries will be distinctly labelled, and safely packed, for which the charge will be moderate; and all packages will be delivered without charge at the Cars or Canal, after which they are entirely at the risk of the purchaser. Explicit directions for marking and shipping should accompany each order.

All orders from strangers should enclose the cash, or contain a satisfactory reference; and all correspondents should remember that in these days of cheap postage, the rule is to prepay.
Hints on Transplanting and Management of Fruit Trees.

1st. Let the hole be dug from twelve to eighteen inches deep, and large enough (the larger the better,) to receive the roots without cramping; throw back and scatter the sub-soil and partially fill the hole with good surface earth, so as to fit it for the tree to stand about as deep as when in the nursery.

2d. Prune off the ends of all the roots, leaving them fresh and free from bruises, and put the tree in the place prepared—cover the roots lightly with rich mellow earth, pour on water and work the tree gently up and down, alternately adding earth and water until every cavity is well filled. Or better, work the earth thoroughly among the roots with the hands.

3d. Pack the earth firmly by pressing it with the foot from the circumference of the hole, towards the body of the tree, then throw in one-third of a wheel-barrow load of well rotted manure, cover it with about two inches of earth, and press the whole well down, leaving it a little crowning about the tree. If planted in Autumn, the earth should be kept from eight to twelve inches high around the body of the tree. This serves the three-fold purpose of supporting it in an erect position, protecting it from mice, and preserving the roots from the action of the frost. In the following Spring the earth should be removed.

4th. Trim up the tree to four or five limbs, suitable to form a top, and cut each of the side limbs back to a bud within four or five inches of the body, leaving the central, or leading limb, from eight to twelve inches long. But when there are no side limbs suitable for this purpose, the tree should be divested of all its branches, and headed back to a height proper to form the top. If planted in Autumn, this pruning should be deferred until early in Spring; but it should by no means be neglected altogether, as nothing so much conduces to the success of transplanting, and to the subsequent beauty and prosperity of the tree. This direction is applicable to fruit-trees of all kinds.

5th. For an orchard, the soil before planting should be made mellow by repeated plowing and kept constantly cultivated for several succeeding years. For this purpose, potatoes, beets, and other low-hoed crops, are best, as they give the trees the frequent benefit of the plow, the cultivator and the hoe, and leave them in the full enjoyment of the necessary stimulants of air and light.

Precautions—First. If the trees come to hand while the earth is too wet to receive them, bury their roots until the condition of the earth is more favorable. Second. If the roots become dry from too long exposure, place them in water and let them remain from 12 to 24 hours. Third. To protect them from drought, nothing is so effectual as to spread a covering of straw, loose litter, or leaves, about their roots, after the transplanting is completed. This keeps the earth light and moist, and renders the too often injurious process of watering unnecessary. It should be practiced, however, only in Spring, as in Autumn it would afford lodgment for mice. Fourth. To prevent injury from these little depredators, stamp the snow around the bodies of all young trees several times during the winter. It may be done most effectually during a thaw.
CATALOGUE OF FRUITS.

APPLES.

The increasing attention to the cultivation of fruits, and the natural emulation growing out of it, are working much to correct the indifference with which it has been the custom to treat the apple orchard, and promise to secure for it a consideration worthy of its importance as yielding, in the most bountiful profusion, the most extensively useful and most indispensable of all the fruits.

The apple thrives best in a rich loam, but it will grow in almost any soil. By following our "hints" on page VI, and by well manuring the orchard in the yearly cultivation of it, the trees will soon become well established, and give an early taste of their quality. The principal treatment besides this, is to prevent and destroy the pests which infest it. We name a few, and the remedies.

The "Borer is found near the ground, and can be extirpated by thrusting a flexible wire into his hole. Wherever traces of them are discovered they should be pursued with unrelenting perseverance, a virtue which they will not fail to exercise to the final destruction of the tree if left unmolested.

The Caterpillar should be attacked when its nests are first apparent in the spring, and before it becomes sufficiently large to destroy the young foliage. This may be done by the hand; or, when out of reach, by entangling them in a brush at the end of a pole and crushing them under the foot. For this purpose they should be visited in the morning, when they will be found "in.""

The Cankerworm is arrested by a tarred bandage bound around the body of the tree. In some parts of the country this pest makes sad havoc, but fortunately it is not general.

The woolly aphis, though not yet very common, is on the increase. Its venomous punctures of the bark and wood render it a formidable enemy to the welfare of the apple tree. Its presence may be detected by the appearance of a white down in the rough places of the tree. When discovered, its haunts should be washed with a mixture of 3-4 of an ounce of sulphuric acid by measure, and 7 1-2 ounces of water, taking care to get none of it on the clothes. The usual destroyer of insects, strong soap suds, seems not to be effectual in this case.

The Blight, which frequently attacks the young limbs of the apple, pear and quince, in the early part of the summer, is unquestionably the work of an insect. The remedy is to cut off the limb several inches below where it appears to be affected, and burn it.

To dislodge insects, and to destroy their colonies, the loose bark should, as often as is necessary, be scraped off from the bodies and large limbs of the trees which should after
ward be well rubbed over with soft soap applied to them with a stiff brush. Mr. Downing recommends a wash made by dissolving 2 pounds of potash in 2 gallons of water. Either of these applications will not only destroy most insects and their eggs that will be reached by it, but will wonderfully promote the growth and vigor of the tree. When this course is adopted once or twice yearly, the tree and its fruit will be very much exempt from insect abominations. Commence the practice with the planting of the orchard and they will never be able to make a lodgment, and the trees will stretch out their limbs like young giants rising refreshed from their slumbers.

Price, Standard Trees, 6 to 8 feet high, .......................... 25 cents each.
Dwarf Trees, 2 and 3 years old, ...................................... 37 1-2cts "

SUMMER APPLES.

American Summer Pearmain,—Medium size, oblong, with dots and streaks of red and yellow; flesh tender and juicy, flavor fine; grows slowly but erect, is a good bearer. Sept.

Astrachan Red,—Rather large, roundish, brilliant deep crimson with a thick bloom, juicy, crisp, and acid, a beautiful apple. Tree a vigorous grower and very productive. August.

Early Harvest.—Size medium, roundish, pale yellow or straw colour, sub acid, fine. Tree moderate grower, and productive. Last of July and August.

Early Joe,—Size medium, deep red on yellow ground. Tree a slow but erect grower and profuse bearer; flesh, tender, juicy and excellent. August.

Early Strawberry,—Medium size, striped with deep red; tender, sub-acid and pleasant. Erect grower and productive. August.

Golden Sweet,—Rather large, roundish, greenish to pale yellow, flesh very sweet and good. Free grower and good bearer. August.

Sine qua non.—Medium, roundish, pale greenish yellow, very tender, juicy, and fine. Moderate grower and bears well. August.

Sweet Bough.—Large, roundish, pale greenish yellow, tender and sweet. A moderate and regular bearer. August.

Sops of Wine,—Rather small, conical, deep crimson, flesh stained with pink, tender, crisp and juicy. Good grower and productive. August and September.

Summer Rose.—Medium, roundish, yellowish streaked with red, tender, crisp, juicy and excellent; good in all localities. Fine grower and productive. Aug. and Sept.

Primate.—Large, or rather above medium; when ripe straw colour tinged with blush; tender, fine grained, juicy, and sub-acid. An abundant bearer and vigorous grower; ripens gradually through August and September.

This is one of the most desirable early apples known. It is milder than the Early Harvest, uniformly fair and sound, beginning to ripen as early, and having the valuable pecu-
liarity of continuing to ripen even into October. It has been cultivated for many years in this, and counties adjoining it West. Where most extensively known it is called by the name we have adopted. A writer, supposing it to be a new variety, has recently described it in Horticultural Journals and given it the name of Rough & Ready. We have propagated it extensively for some years.

**AUTUMN APPLES.**

_Autumn Strawberry._—Medium, roundish, with streaks of light and dark red; tender, juicy and agreeable. Vigorous and productive. Thomas says one of the very best autumn apples. Sept. and Oct.

_Dyer or Pomme Royal._—Large, roundish, light yellow with a faint brown cheek, fine grained, tender, juicy and of excellent flavor. By the same authority this has but few equals. Sept. and Oct.

_Fall Pippin._—Very large, roundish, oblong conical, greenish yellow becoming rich yellow when ripe; flesh rather firm, rich and excellent; shoots vigorous, becoming spreading, moderately productive. Fine in all localities. Oct. to Dec.

_Gravenstein._—Large, roundish, striped with bright red on yellow ground; tender, juicy, very rich and high flavored. Fine in all localities. Vigorous, erect, and productive. Sept. and Oct.

_Hawley, or Dowse._—Large, roundish, pale yellow, tender, fine grained and rich; very valuable. Good grower. Oct. and Nov.

_Jewett's Fine Red._—Medium, tender, fine grained and excellent, nearly first rate; striped red on yellow ground. Oct. and Nov.

_Jersey Sweet._—Medium, greenish-yellow, thickly striped with red, very sweet, juicy and tender, good in all localities. Fine grower and bearer. A popular apple. Sept. and Oct.

_Lowell, or Orange._—(Queen Anne, or Tallow Pippin of O.) Large, roundish oblong; green becoming rich yellow; surface oily; valuable for its fairness, good quality, and great productiveness. Sept. and Oct.

_Maiden's Blush._—Medium to large, oblate or flat, with a beautiful blush cheek; fine grained and tender, but not rich. Good grower, and uniformly productive. Sept. and Oct.

_Northern Sweet._—Rather large, roundish, and sometimes ribbed; smooth and slightly oily; deep golden yellow, often with a fine blush on the sunny side. Flesh white, fine grained, juicy and sweet, with a very rich flavor. Tree vigorous, hardy and productive. Sept. and Oct.

_Porter._—Rather large, oblong, bright yellow; tender, rich and of fine flavor. Moderate grower and productive; esteemed in the Northern States. Sept.

_Rambo._—Medium, oblate; yellowish ground streaked with dull yellowish red, and somewhat dotted; tender, rich, mild, and often very excellent. Said to be fine in nearly all localities. Oct. to Dec.

**WINTER APPLES.**

_Baldwin._—Large, roundish, bright red, mild, juicy and rich. Vigorous grower, upright, and productive. First rate. Dec. to March.

_Belleflower, Yellow._—Large, oblong, pale yellow with a deep blush on sunny side; tender, fine grained, crisp, juicy and excellent. Free grower and regular bearer. Feb.

_Blue Pearmain._—Very large, roundish, purplish-red covered with a rich bloom,
very juicy, pleasant, sub-acid. Vigorous grower and moderate bearer. Said to be valuable at the North. Nov. to Jan.

**Cornish Gilliflower.**—Medium size, ovate, dull green, with a brown cheek; firm and rich with a high flavor. Ripens gradually through the winter.

**Dutch Mignonne.**—A very large beautiful apple, orange and russet, with streaks of red, and finely flavored. Erect grower and good bearer. Nov. to March.

**Famense.**—Medium size, round, striped and blotched with deep crimson; juicy, sub-acid, spicy and pleasant. Tree vigorous. Nov. to Jan.

**Green Sweeting.**—Medium, nearly round, greenish, tender, sweet and spicy; not excelled; one of the best keeping sweet apples. Moderate grower. Nov. to May.

**Hubbardston Nonsuch.**—Large, striped yellow and red, tender, juicy, and fine. Strong grower and good bearer. Nov. to Jan.

**Jonathan.**—Medium, round ovate, striped red and yellow; flesh tender, juicy and rich. Tree very productive. Nov. to April.

**King.**—A large handsome fruit, striped red and yellow. Said to be fully equal to Swan. Tree vigorous and fruitful. Oct. to Jan.

**Lady Apple.**—A beautiful little dessert fruit; flat, pale yellow with a deep red cheek; crisp, juicy, and pleasant. Nov. to May.

**Ladies' Sweeting.**—Large, roundish, striped with red on yellowish-green ground, —in the Sun nearly quite red; sweet, tender, juicy, fine, agreeable, rich, and slightly perfumed. A good bearer. One of the best sweet winter apples. Nov. to May.

**Mother.**—Large, oblong, deep red on yellow ground; very tender, rich, aromatic and mild; somewhat resembles the E. Spitzenberg in appearance. A good bearer. Nov. to January.

**Norton's Melon.**—Medium or large roundish; bright red on pale yellow ground; tender, very juicy, spicy and pleasant. A handsome and delicious fruit. Tree slow grower but good bearer. Oct. to April.

**Northern Spy.**—Large, roundish; handsomely striped with red; juicy, rich, mild, and agreeable. Vigorous grower and fine bearer. Dec. to June. This apple is a universal favorite, being one of the largest, best, most beautiful, and long keeping apples yet known.

**Newtown Pippin.**—Medium or large, roundish, dull yellowish green. Flesh greenish white, juicy, rich, crisp, fine grained and high flavored. Has a high reputation both at home and abroad. Nov. to June.

**Peck's Pleasant.**—Large, roundish, light green, becoming yellow; very tender, with a mild, rich, fine clear pippin flavor. Erect grower and good bearer. Nov. to April.

**Pomme Grise.**—Rather small, roundish; a grey russet; very tender, fine grained, rich, and high flavored. One of the best dessert apples for the extreme North. A late keeper.

**Reinette, Canada.**—Very large, conical and flattened; greenish yellow; flesh fine, rich, juicy, tender and sub-acid. Nov. to Feb.

**Red Canada.**—(Old Nonsuch) Medium, red with white dots; flesh fine, rich and delicious. One of the best. Nov. to May.

**Rhode Island Greening.**—Large, roundish, green becoming greenish yellow; tender, juicy, rich, rather acid and slightly aromatic. Strong grower and very productive. In the South it becomes an Autumn fruit; in the North, March and April.

**Russet, Golden.**—Medium, dull russet with a tinge of red; crisp, juicy and high flavored. A fine grower and good bearer. Very popular. Nov. to April.
Russet, Roxbury or Boston.—(Putnam Russet of Ohio,) Medium or large, roundish; a rough russet on greenish yellow ground; somewhat granular, crisp, rather sub-acid and moderately juicy. Tree vigorous, and exceedingly productive. It will keep until June.

Swaar.—Large, roundish, greenish yellow, a little russeted; tender, with a very mild, rich, agreeable flavor. Moderate grower and bearer. One of the best. Nov. to May.

Seek-no-further.—(Westfield,) Medium to large, roundish, slightly russeted, with dull red stripes; tender, rich, spicy and of fine flavor. A good grower and bearer. Nov. to Feb.

Spitzenberg, Esopus.—Large, round ovate, deep red, faintly striped and covered with bloom; rich, crisp and excellent. Slow grower, and moderate bearer. Considered by some unequaled in its high rich flavor. Nov. to April.

Talman’s Sweeting.—Medium, roundish, clear light yellow; firm, rich and very sweet; fine for the kitchen. Vigorous and productive. Nov. to April.

Van de Vere.—Medium, roundish, light red on yellow ground, with numerous dots; rich, mild, and excellent in flavor. Fair grower and bearer. Oct. to March.

Wagener.—Medium or large, yellow ground with dull red stripes, often streaked with russet; very fine grained, tender, aromatic, mild and excellent. Dec. to May.

Winter Pearmain.—Medium, oblong; greenish yellow, with broken stripes of dull red; tender with a pleasant, sub-acid lemon flavor. Moderate grower and bearer. Nov. to March.

Amongst many other varieties, cultivated by us more or less extensively, according to quality, we have the following; a greater part of which enjoy a high local reputation. Those designated thus (*) have been tested by us, and we esteem them all well worthy of cultivation.

Hurlbut Stripe, *Munson Favorite, *Carriage,
McLellan, *Batter, *Virginia Sweet,
Pine Apple Russet, *Superb Sweet, *Bohannan,
*Bracken, *Summer do., *Belle et Bonne,
*Monson Sweeting, *Prior’s Red, Kane,
*Vineent, *Rawie’s Janette, Summer Belleflower,
*Middle Apple, Western Spy, *Colvert, &c., &c.

---

ORNAMENTAL AND FOR PRESERVING.

Double Flowering Chinese.—A beautiful ornamental tree, producing large clusters of semi-double rose colored blossoms.

Golden Beauty Crab.—A favorite, and of great beauty—has golden colored fruit.

Hyslop’s Crab.—Very Ornamental.

Hughes’ Virginia Crab.—Famous for cider.

Red Siberian Crab.—Fruit small and beautiful, yellow and scarlet; bears when young. Sept. and Oct.

Large Red Siberian Crab.—Nearly as large again as the last described—similar in appearance. Trees much larger. Sept. and Oct.

Large Yellow Siberian Crab.—Fruit quite large and fine, golden yellow. Grows thrifty.
PEARS.

**PRICE.** Standard Trees, on pear stocks, 2 to 4 years old, 50 ets.
Pyramidal Trees, on Quince “ 2 to 4 “ “ 50 ets.
Extra Sized Trees of each kind, of bearing age, 75 ets. to $1.00

The greatly increased demand for Pear Trees has led, of late, by the production of native seedlings, and by importations from abroad, to a large accession of new and excellent varieties, so that Nurserymen can now supply their customers with varied assortments, ripening in succession through the entire year. The same cause has also led to an increased cultivation of the Pear upon the Quince stock, in the form of Pyramids, or Dwarfs, whereby the natural impatience to partake of this delicious fruit can be soon indulged; these trees coming into free bearing by the third or fourth year. Their compact growth, enabling them to be planted at short distances apart, renders a large number of them available even to the owner of a small plot of ground; and, placed intermediately in an orchard of Standards standing from 20 to 30 feet apart, it will be seen that in very brief time the orchard will become even profitable for market, increasing rapidly in productiveness until the Standards themselves come in to swell the tribute. Sagacious fruit growers are now widely availing themselves of this facility to increase their store. Our stock, both of the Standards and Dwarfs, is very extensive, and the trees are of remarkable beauty and vigor.

The Pear tree will grow in almost any soil, provided the sub-soil is not too wet; but it thrives best in a deep strong loam. As too luxuriant a growth may induce blight, a moderate top dressing of manure in the autumn is all that is necessary.—When the tree is assailed by the blight, the part affected should be cut off far below all appearance of disease.

The insects which beset it are fewer than those of the apple, being chiefly the caterpillar, the bark louse, and the slug-worm. The caterpillar is to be destroyed as directed under the head of the apple; and the bark louse treated to a cataplasm of soft-soap, or a strong bath of whale-oil soap suds.

The slug-worm is almost peculiar to the Pear and Cherry Tree. When fully grown it is about half an inch long, of a dark olive green. It hatches from a small scale-like egg deposited on the top of the leaf. Its numbers are often so great as entirely to denude a large tree of its foliage. It is easily and effectually assailable. Air slaked lime powdered liberally over the tree, adhering to its slimy skin, causes it speedily to roll to the ground. Ashes are often used but they are not so fatal.
**SUMMER PEARS.**

**Amire Joannet.**—This is recommended on account of its earliness. A fine grower, and good bearer; fruit small, pale yellow. Succeeds well on quince. 15th to last of July.

**Beaupresent d’Artois.**—A good, juicy, half melting pear, medium size; vigorous, and productive; does well on quince. Sept.

**Bartlett.**—Large, buttery and melting; fine grained and tender; musky flavor. Growth erect; very productive, bearing when young; does finely on quince. Sept.

**Bloodgood.**—Medium, buttery, rich and melting; a fair grower, first quality; and succeeds well on the quince. Sept.

**Canandaigua.**—(Catharine,) Similar to the Bartlett, an upright and vigorous grower; very productive. Does well on the quince. Sept.

**Dearborn’s Seedling.**—Scaresly medium in size; clear yellow, with minute specks; fine grained, juicy and melting; fine grower, and bears while young. Does admirably on the quince. One of the best summer pears; ripens nearly with the Bloodgood. August.

**Doyenne d’Ete.**—Small, clear yellow, reddened at the crown; juicy, sweet and melting. Good grower, and bears well even while young. Ripens with the Madeleine, and succeeds well on the quince. Aug.

**Kingsessing.**—(Leech’s,) A new pear from near Philadelphia; described as large, buttery, rich and delicately flavored. Strong grower, and appears to do well on the quince. We received our grafts from Dr. W. D. Brinckle of Philadelphia, who first brought it into notice. Last of August.

**Madeleine.**—Medium, yellowish green, very juicy and melting, with an agreeable refreshing flavor; a fair grower and early bearer. Does well on the quince. One of the best early Pears. 1st of August.

**Muscadine.**—Medium, yellowish green, thickly dotted; very juicy and melting, with an agreeable refreshing flavor. Shoots vigorous and rather thick. Sept.

**Moyamensing.**—(Smith’s) Large, buttery and melting, extra fine flavor; lemon yellow, sometimes a little russeted. A fair grower. Succeeds well on quince. Received our grafts from J. B. Smith, Esq., of Philadelphia, through our correspondent Dr. W. D. Brinckle. 1st of Sept.

**Osbard’s Summer.**—Medium size, yellow, with a brown cheek; melting with a sweet, mild and fine flavor. Fair grower, and productive. Succeeds well on quince. Aug.

**Ott.**—Small, greenish yellow; melting, rich and perfumed; resembles closely the seckel its parent; appears to do well with us on the quince. Early in Aug.

**Rostiezer.**—Medium yellowish green, with a brown cheek; juicy, melting, sweet, with a high perfumed flavor. It is said scarcely to have an equal among summer pears for rich flavor. Succeeds well on quince. Sept.

**Summer France Real.**—Medium, pale yellowish green; fine grained, buttery, melting and rich; excellent. Fine grower, and good bearer on quince. Shoots and leaves rather downy. Last of Aug. to middle of Sept.

**Tyson.**—Medium, bright yellow, with a brown cheek; buttery, melting, aromatic and sweet. A vigorous grower on both pear and quince; is estimated one of the best summer pears. Sept.
AUTUMN Pears.

Buffum.—Medium, yellow, with a reddish brown cheek; buttery and sweet, and fine flavored. Vigorous grower. Succeeds well on the quince. Sept.

Brown Beurre.—Medium to large; yellowish green, russeted; very juicy, melting and buttery, with a rich vinous flavor. Said to do well on the quince. Oct.

Beurre Bosc.—Large, deep yellow, a little russeted; juicy, buttery, rich, and high flavored. A good grower; grows single, looking as if thinned on the tree, and is always of fine size. Sept. and Oct.

Beurre d’Anjou.—A large, fine, melting pear, resembles the Brown Beurre both in colour and quality. A good grower and does finely on the quince. Sept. and Oct.

Beurre d’Automne.—Medium, yellow, with a red cheek, sweet and rich. Good grower and productive; fine on quince. Oct. and Nov.

Beurre Capiaumont.—Medium, yellow, with a red cheek, sweet and rich. Good grower and productive; fine on quince. Oct.

Beurre Diehl.—Large size, dull yellow, and much dotted; sugary, rich and juicy. Growth rapid and stout; first rate on quince. Oct. to Dec.

Beurre, Golden of Bilboa.—A large and beautiful pear of first quality, buttery and melting; fine yellow, somewhat russeted. A strong grower; does well on quince. Sept. and Oct.

Bergamot, Cansel’s.—Medium to large, rough, brown; juicy and melting, and high flavored. Rather slow grower and tardy bearer. Oct.

Belie Lucrative.—(Fondante d’Automne) Medium, yellowish green, slightly russeted; melting, delicious and fine. Fine grower and good bearer; and does well on quince. This is said to be one of the best autumn pears. Sept. and Oct.

Comte de Lamy.—Medium, yellow, slightly brown; melting and fine flavored. Good grower, and does well on quince. Oct.

Dix.—Large, fine yellow, melting, juicy and rich. Fair grower; does well on quince only when double worked. Oct.

Duchesse d’Orience.—Large, golden yellow, slightly russeted; buttery, melting, rich and delicious. Fair grower, bearing early, and does well on quince. Oct.

Doyenne Seaulle.—Medium, roundish, pale yellow, tinged with red, buttery, rich, melting and very good. Oct.

Doyenne Bousche.—Large, lemon yellow, a little russeted; buttery, melting, and juicy, with a first rate flavor. Strong grower; succeeds well on quince. Oct.

Doyenne White.—(Virgalieu) Medium, pale yellow with a faint blush; most delicious flavor, and universally esteemed; succeeds well on the quince. Oct. and Nov.

Doyenne Gray.—Medium, cinnamon russet; melting, buttery, rich and perfumed; somewhat similar to the preceding. Nov.

Forelle.—(or Trout Pear) Medium, yellow, with a vermilion cheek, and dotted; a melting rich pear; bears early and profusely; grows well on quince. Nov.

Flemish Beauty.—Large, pale yellow, somewhat russeted, juicy, melting, rich, and sweet. Strong grower, and good bearer. Sept. and Oct.

Frederick of Wurtemberg.—Large, light yellow, with red cheek; very melting
and buttery; sometimes quite delicious. Bears early, and a vigorous grower, on pear or quince. Sept.

**Henry IVth.**—Rather small, greenish yellow, somewhat russeted; juicy, melting, rich and perfumed. Stout grower and fine bearer; succeeds well on the quince. Sept.

**Heatcroft.**—Medium, greenish yellow, thinly russeted; buttery, melting and fine flavored. Very productive and profitable. Sept.

**Louise Bonne de Jersey.**—Large, yellowish green, with a red cheek; very juicy, buttery, melting and rich. One of the very best, very productive. Grows vigorously on quince. Sept. and Oct.

**Marie Louise.**—Large, yellowish green; buttery, melting and vinous; sometimes very rich and fine. Growth very straggling, but an abundant and early bearer. Oct.

**Napoleon.**—Medium, pale yellowish green; uncommonly juicy and melting; moderately rich. Good grower, bears early and very productive; grows well on the quince. Oct.

**OSONdaga, or Swan's Orange.**—A very large, rich, greenish-yellow pear, melting and high flavored. Vigorous grower, and very productive; fine on quince. Oct. and Nov.

**Oswego Beurre.**—Medium, yellowish green with thin russet; melting and juicy, with a rich vinous flavour. Good grower, and profusely productive. A very valuable pear; fine on the quince. Oct. to Dec.

**Paradise d'Automne.**—Large, yellowish orange, a little russeted; melting, very buttery; with a rich, and excellent flavor. Vigorous growth; resembles Beurre Bosc. Oct.

**Seckel.**—The best and highest flavored pear known; small, rich yellowish brown. Stout grower and good bearer. Sept. and Oct.

**St. Ghislain.**—Medium, buttery and juicy, with a fine flavor. Stout grower, and bears well. Sept.

**Stevens' Genesee.**—Large, yellow, buttery and fine flavored. Vigorous growth. Bears profusely; fine on quince. Sept and Oct.

**Urbaniste.**—Large, pale yellow, faintly russeted; melting, delicious and perfumed; does well on the quince. Oct. and Nov.

**Van Mons' Leon le Clerc.**—Very large, yellowish green, slightly russeted; buttery, melting and rich. Vigorous and productive; does well on the quince. Oct. and Nov.

---

**WINTER PEARS.**

**Beurre d'Aremberg.**—Large, rich, melting, with a vinous flavor. Vigorous and productive; does well on quince. Dec. to Jan.

**Beurre Easter.**—Large, melting and fine; does well on quince. Keeps through the winter.

**Beurre Gris d'Hiver Nouveau.**—A large, new, buttery, melting pear, with a rich vinous flavor. Bears young; does well on quince. Nov. to Jan.

**Chaumontelle.**—Large, fine, buttery and melting; does well on quince. Dec.

**Columbia.**—A large, buttery pear, melting and rich; very productive; does well on quince. Nov. and Jan.

**Glout Morceau.**—A large, sweet, melting, buttery pear. Vigorous and productive; does finely on quince. Dec.
**WINTER PEARS.**

**Lawrence.**—A large, rich flavored, melting pear. Good grower and bearer; does well on quince. Nov. to Feb.

**Passe Colmar.**—Large, rich, buttery and melting. Vigorous grower and good bearer; does well on quince. Dec.

**St. Germain, Prince's.**—Large, sweet, juicy and melting. Fair grower and bearer; ripens through the winter.

**Vicar of Winkfield, or le Cure.**—Large and long pear; not of first quality, but of great productiveness, and therefore desirable. Fine for cooking; does well on the quince. Nov. to Jan.

**Winter Nellis.**—Medium, yellowish green, fine grained, buttery, rich and sweet; Growth slender and straggling. Nov. to Jan.

**Catinka.**—Very large, yellow, with brownish red cheek; hard and rough to the taste; extensively used for baking. Nov. to March.

As the pear is a fruit to which great attention is now paid, we add below, the names of many varieties sufficiently tested in this country to warrant the opinion that a large portion of them are very desirable, and quite a number of them first rate. Small trees of any of them, and bearing trees of a few, can be supplied if desired. Such as are known to do well on the quince are marked with a (q.)

P. S. While these sheets were in the hands of the printer, the following varieties of Pears have ripened upon our grounds. Specimens exhibited at our County Fair were tested by the judges and others, and pronounced of high excellence. Their judgment is embodied in our descriptions.

Ananas,—Medium, greenish yellow with deep red cheek, high flavored, juicy and refreshing. In quality, quite like Louise Bonne de Jersey. Sept.

Bonne d'Ézec,—Large, yellow with a fine blush, melting, sweet and delicious; one of the very best. A fine grower. Sept.

Beurre Goubault,—Medium, roundish, green, tender, sweet and melting. Middle of Sept.

Beurre Moïret,—Medium size, yellowish, melting, slightly astringent, very high flavored, sweet and delicious. One of the best. Sept.

Doyenne Robin,—Medium, roundish, yellow, buttery, refreshing and excellent. Sept.

St. Michael Archangel,—Large, handsome, melting, and high flavored. Sept.

CHERRIES.

PRICE. Standard Trees with fine heads, 2 years old, .... 37 1-2 to 50 cts.

" Dwarf, or Pyramidal Trees, ................... 37 1-2 to 50 "

The Cherry needs not a strong soil; indeed such a soil is often fatal to it by stimulating it to too luxuriant a growth, causing the tree to split, and the bark to cleave from the body. A sandy or gravelly loam is to be preferred.

The many fine varieties which the Nurseries now contain are fast displacing the old and worthless Morellos which have been so long, and still are, numerable of the ground in too many gardens and door-yards of the country. Many of the finer kinds, being rapid growers, and highly beautiful in their forms, are often obtained for shade and ornament, as well as for their refreshing fruit. Persons desiring them for this double purpose, will be advised by us cheerfully as to the selection of kinds most appropriate.

The Cherry too, like the Apple and the Pear, is cultivated as a Dwarf, it being worked for this purpose upon the Mahaleb stock. As a matter of curiosity or of fancy, and in some cases of convenience, it is now much called for in this form.

The Slag-worm is the only insect that infests the tree. Its summary disposal is provided for under the head of the Pear.

HEART CHERRIES.

Early White Heart,—Medium, dull whitish yellow, tinged with pale red, firm, tender, sweet and pleasant. Growth erect; quite early.

Bauman's May, or May Bigarreau,—Small, dark red, sweet, juicy, and tender. Good bearer, and vigorous grower; ripens early, about the middle of June.

Black Heart,—Large, black, tender, juicy and rich. Vigorous grower. 1st week in July.
BIGARREAU CHERRIES.

**Black Eagle.**—Large, black, tender, rich, juicy, and high flavored. Vigorous grower, and productive. 1st to 15th of July.

**Black Tartarean.**—Very large, purplish black; half tender, juicy, rich and delicious. Vigorous grower, and very productive. Latter part of June into July.

**Burr's Seedling.**—Large, fine, deep clear red; half tender, sweet, rich and delicious. Vigorous grower, and very productive. 1st of July.

**Coe's Transparent.**—Medium, pale amber, reddened in the sun; tender, melting and excellent. Vigorous and upright grower. Last of June.

**Davenport's Early.**—A little earlier than Black Tartarean, resembling it in other respects.

**Downer's Early Red.**—Large light red, tender, juicy, and delicious. Vigorous and productive. Middle of July.

**Downton.**—Large, light cream color, stained with red; tender, rich and delicious. Growth spreading; rather late.

**Early Purple Guigne.**—Rather small, purple, tender, juicy and sweet. Growth spreading. Middle of June.

**Elton.**—Large, pale yellow in the shade, nearly covered next the sun with light red; half tender, juicy, rich and sweet. Growth vigorous. Last of June.

**Knight's Early Black.**—Large, black, tender, juicy, rich and delicious. Vigorous and productive. Middle to last of June.

**Manning's Mottled.**—Large, amber, mottled with red; tender, sweet and excellent. Vigorous and productive. Last of June.

**Sweet Montmorency.**—Small, light red, sweet and tender. Vigorous and productive; rather late.

**Sparhawk's Honey.**—Medium, light red, juicy, delicate, sweet and of fine flavor. Vigorous and productive. Middle of July.

---

**BIGARREAU CHERRIES.**

**Bigarreau, or Yellow Spanish.**—Large, pale yellow, with a red cheek; firm, juicy, and excellent; one of the best and handsomest of light colored cherries. Vigorous and productive. End of June.

**Butter's Yellow.**—Medium, pale yellow, firm, crisp, sweet and good. Vigorous and productive. Last of June.

**China Bigarreau.**—Medium, amber, mottled with red; firm, sweet, and rich. Vigorous and profuse bearer. 1st week in July.

**Elkhorn, or Tradescaut's Black Heart.**—Very large, black, firm, of a liver-like consistency, juicy, and of a fine flavor. Vigorous grower, and productive. From middle to last of July.

**Flesh Colored Bigarreau.**—A large and beautiful cherry, resembling the Elton. End of June.

**Florence.**—Large, amber yellow, firm, juicy, and sweet; rather late, similar to Bigarreau.

**Great Bigarreau.**—Described by Mr. Downing in the Horticulturist as one of the largest and finest cherries in the country. Somewhat of the character of Black Tartarean but larger.
GOVERNOR WOOD.—Very large, rich, light yellow with a red check, half tender, juicy, sweet, and delicious. Said to be one of the very best. Last of June.

HILDESHEIM BIGARREAU.—Medium, yellow mottled with red; firm, sweet and agreeable. Good grower. 1st of August.

HOLLAND BIGARREAU.—Very large, whitish with red spots; firm, sweet and fine. End of June.

LARGE HEART SHAPED BIGARREAU.—Large, yellowish brown, firm, purplish, becoming firm and rich. Vigorous grower. Middle of July.

LARGE BIGARREAU OF MEZEL.—Said to be extra large and fine; has fruited with us, but does not come up, as yet, to its great European reputation.

MADISON BIGARREAU.—Medium, amber yellow, mottled with red; half tender, sweet and pleasant: most too tender for a Bigarreau. Very productive. Last of June into July.

NAPOLEON BIGARREAU.—Very large, pale yellow and deep red, very firm, with a fine flavor, juicy and sweet. Vigorous grower, and very productive; a favorite. Beginning of July.

ROCKPORT BIGARREAU.—Large, pale amber, with clear red; firm, juicy, sweet and rich, with an excellent flavor. Vigorous grower; rather early in ripening.

WENDELL'S MOTTED BIGARREAU.—Medium, dark red, quite mottled; firm, crisp, and high flavored. Growth upright; rather late.

DUKE AND MORELLO CHERRIES.

BELLE DE CHOISY.—Medium, pale amber, mottled with red; very tender, juicy, melting, sweet and rich. Last of June.

BELLE MAGNIFIQUE.—Large, late, red, rather acid. Tender and juicy. Slow grower, and fine bearer. Last of July.

CARNATION.—Large, light red, mottled with orange; firmer than most of this class; tender, juicy and excellent. Good grower and fine bearer. From middle to last of July.

EARLY RICHMOND, KENTISH, OR MONTMORENCY.—An early, acid, red cherry; fine for culinary purposes. June.

JEFFREY'S DUKE.—Medium, lively red, tender, rich and juicy, with a fine flavor. Middle of June.

LATE DUKE.—Large, light red, quite late and fine. Last of July.

MAY DUKE.—Large, dark red; very juicy and melting. Vigorous and productive. Middle of June.

ENGLISH MORELLO.—Large, dark red, approaching black, tender, sub-acid and rich. Late.

PLUMSTONE MORELLO.—Large, deep dark red, rich and fine; said to be one of the best Morellos. July and Aug.

REINE HORTENSE, OR MONSTREUSE DE BAVAY.—Said to be very fine; large, bright red, tender, juicy and delicious. Vigorous and productive.

RUMSEY'S LATE.—Light red, juicy, and very acid. Very late.
PLUMS.

A heavy soil with a considerable mixture of clay is most congenial to the Plum, although its universal culture shows that it readily grows in any.

The bane of the Plum Tree is the black-wart; and of its fruit, the curculio. Whenever the former appears, the limb affected should be cut off and burnt; or if it is too large to be removed, the excrecence should be cut out as thoroughly as possible, and the wound washed with a weak solution of copperas, which, it is said, will effectually check its progress. This disease is happily of rare occurrence in the finer varieties.

The curculio is a small hump-backed beetle, and is the grand pest of all the smooth skinned fruits. It commences its operations, when the fruit has attained the size of a large pea, by puncturing it with its proboscis and depositing in it an egg. This soon produces a small white grub which eats to the centre, and causes the fruit to fall. Although many labor-saving devices have been resorted to to defeat its operations, yet none of them appear to be of universal efficacy. Troublesome and expensive scare-crows, like heaps of fresh manure, and brick pavements, placed around the trees; or ridiculous ones, like white rags and white-wash, have proved to be, in his sight, only "weak inventions of the enemy." We believe Mrs. Glass's preliminary to cooking the rabbit to be eminently essential to the successful terminating of his attacks,—"first catch him." This is most effectually done by spreading sheets under the tree and suddenly jarring it with the hand or a mallet, when the creature will instantly drop from it. Some practice is necessary at first to distinguish him from a dried bud, or fragment of bark, as he lies motionless and innocent upon the sheet; but having attained the skill, wreak your vengeance upon him. This process repeated at sunrise and sundown, (and if oftener, the better,) for a week or so, will effectually preserve your plums; and they are worth the labor.

PLUMS--PRICE 50 CENTS EACH.

Autumn Gage,—Medium, pale yellow, sweet, juicy and good. Grows slowly and bears well. Middle to last of Sept.

Bingham,—Large, deep yellow with a few dots of red, juicy, rich and delicious. Productive. Sept.

Bleecker's Gage,—Above medium, yellow, juicy, rich and luscious. Fair grower and productive. Last of Aug.

Blue Imperatrice,—Medium, purple, firm, rich, and sugary. Ripening very late.

Buel's Favorite,—Large, pale green, firm, juicy, rich and high flavored. End of August.
Cherry, or Early Scarlet.—Small, red, juicy, soft, sub-acid and melting. Last of July.

Coe’s Golden Drop.—Large and handsome, light yellow, firm, rich and sweet. Fair grower and quite productive. Last of Sept.

Columbia.—Large, dark purple, moderately juicy and rich. Vigorous and productive. Sept.

Dennison’s Red.—Large, light red, rich and good. Vigorous and produces well. Last of Aug.

Dennison’s Superb.—Large, pale yellowish green, clouded with purple, not juicy, but rich and vinous. Vigorous and productive. End of Aug.

Domine Dull.—(German Prune of some,) Medium, dark purple; juicy, rich, sweet and good. Profuse bearer. Rather late.

Dunns Purple.—Large; reddish purple, juicy, moderately sweet. Good grower and productive. Sept.

Early Royal.—(Royale Hative,) Medium, light purple, with a rich, high flavor. Very early.

Fellenberg.—Purple, juicy and delicious. Tree vigorous and very productive. Sept.

Frost Gage.—Small, purple, juicy, sweet, rich and melting. An immense bearer. October.

General Hand.—Largest native variety, pale yellow, juicy, sweet and good. A sure bearer and of high reputation where known. Beginning of Sept.

Green Gage.—Small; standard of excellence. Slow grower. 15th of August.

Gathrie’s Apricot.—Medium, yellow, said to be very fine. Last of Sept.

Howell’s Apricot.—Small, light brown; juicy, sweet and perfumed; very productive. Early in Aug.

Hudson.—Medium, yellow, shaded with green; juicy, melting, rich, and excellent. Ripens three weeks before Imperial Gage.

Hurling’s Superb.—Very large, yellowish green, firm, rich, brisk and excellent. Good grower and moderate bearer. Middle to last of August.

Ickworth Imperatrice.—Medium, purple, sweet, juicy and rich; very late, keeping into the winter, becoming dryer and sweeter.

Imperial Ottoman.—Medium, pale greenish yellow, very juicy, sweet and excellent. A great bearer. Aug.

Imperial Gage.—(Prince’s Imperial Gage.) Large, greenish yellow; juicy, melting and rich. Fine grower, and great bearer. 15th of Aug.

Jaune Hative.—(White Primordian,) Small, yellow, juicy, with a sweet, mild, flavor. The earliest plum, ripening about the middle of July.

Jefferson.—Large, yellow, faintly reddened in the sun; juicy, rich, and luscious; one of the most valuable. End of Aug.

Judson.—Small, pinkish damask; juicy, rich, vinous and high flavored. A few days before Green Gage.

Kirke’s.—Medium, dark purple, firm and rich: resembles Purple Gage. Much esteemed. Middle of Sept.

La Royale.—(Royal,) Medium, reddish purple; firm, juicy, melting, rich, and of excellent flavor. Slow grower, and moderately productive. 1st of Sept.
**Lawrence's Favorite.**—Large, yellowish green, melting, juicy, rich and excellent. Vigorous and productive. Aug.

**Lombard, or Bleecker's Scarlet.**—Medium, violet red, not rich, but juicy, pleasant and of fair quality. A good bearer. End of Aug.

**Long Scarlet, or Scarlet Gage.**—Medium, bright red, juicy, and sweet. Fair grower and bearer. Last of Aug.

**Magnum Bonum, Red.**—Large, violet red; fine for culinary purposes. Vigorous and productive. End of Aug.

**Magnum Bonum, Yellow.**—Large, yellow, same as the preceding. End of August.

**McLaughlin.**—Large, yellowish, tinged with red; firm, juicy, sweet and luscious. Vigorous grower. Last of Aug.

**Mulberry.**—Large, pale dull yellow with crimson dots; rather coarse, but melting and rich. Stout grower. 1st of Sept.

**Nectarine.**—Large, purple, rather coarse but rich. Rather early.

**Orange.**—Large, yellow, rather coarse, but sweet and good; one of the largest plums. Vigorous and productive. 1st of Oct.

**Orleans, Early.**—Medium, purple; sweet, good, and rather rich. Vigorous and very productive. Middle of Aug.

**Orleans, Smith's.**—Large, reddish purple, firm, juicy and rich. Vigorous and productive. Latter part of Aug.

**Peach.**—Large, salmon to light red, rather coarse, but sprightly and juicy; much esteemed for large size and handsome appearance. Ripens about 20th Aug.

**Penobscot.**—Said by Mr. Downing to be a fine, desirable plum.

**Prune d'Agen, or Robe de Sergent.**—Said to be the very best plum for drying. Tree very prolific.

**Purple Favorite.**—Medium, brownish purple; juicy, tender, melting, sweet and excellent. Growth slow. Last of Aug. and 1st of Sept.

**Purple Gage.**—Medium, violet with light blue bloom, firm, rich, sugary and of very high and excellent flavor. Ripens late, and hangs long on the tree.

**Red Diaper.**—Large, reddish purple, light blue bloom, juicy, melting, rich and of fine flavor. Slow grower. Last of August.

**Reine Claude de Bavay.**—Large, greenish yellow spotted with red; firm, juicy, sugary, rich and of fine quality. Very productive; resembles Washington in growth, but the leaves and shoots are smaller. Hangs long on the tree. Sept.

**Red Gage.**—Medium, brownish red, juicy, melting, rich, mild and sweet; unusually pleasant and refreshing. Rather early.

**River's Early Favorite, or Prolific.**—Roundish oval, purple, nearly as large as the Orleans. A sure bearer, productive and hardy; in flavor equal to the early Morocco and ripens earlier.

**Royal de Tours.**—Large, reddish violet, with a blue bloom: firm, juicy, rich and high flavored. Quite early, and valuable on this account particularly.

**Schenectady Catharine.**—Nearly medium, purplish violet, melting, sweet, rich and excellent. Said to be next to the Green Gage in quality, and ripens at the same time, about the middle of Aug.

**St. Martin's Quetsche.**—Medium, pale yellow, very juicy, sweet and excellent. A profuse bearer; one of the very best late plums, and very profitable.
Washington, Bolmar's. - Large, green, somewhat reddish; juicy, sweet and fine. Vigorous in growth, and very productive. One of the best. Last of Aug.

Yellow Gage, Prince's. - Medium, golden yellow, rich, sugary and melting. Early in Aug.

PEACHES.

Price—Standards, .................................................. 20 cents each.
Dwarfs, on Plum stocks, ............................................ 25 " "

The prosperity of the Peach Tree requires that it should be shortened-in annually in February or March. This consists merely in cutting back about half of the smaller, or two-thirds of the larger limbs of the last year's growth, beginning when the tree is two years old, and continuing it during the life of the tree. Of course the eye will direct the exact distance to which the limbs should be cut back, care being taken to preserve a round, well-balanced head. This treatment contributes not only to the long continued healthfulness and beauty of the tree, but to the superior size and lusciousness of the fruit. Every cultivator should take the pains to practice it.

A disease called the Yellows, from the sickly appearance which it imparts to the leaf, is the only one to which it is liable; but it is fortunately not known in the interior of the State. This fact should be borne in mind by those wishing to make plantations. No remedy is known but to remove it, root and branch, and cast it into the fire. This should be done promptly, or its contagious nature will infect the whole orchard.

The Peach borer is the only insect whose attacks are formidable. It is the product of an egg, deposited, during the summer, by a slender wasp-like insect in the tender bark just below the surface of the ground. The egg hatches into a white grub and commences feeding upon the wood next the bark, continuing its depredations through the winter, often to the fatal injury of the tree. Its presence is soon discovered by its castings, or by the exuding of the gum from the wound, when a little cutting with a knife will expose it to sight. Search should be made in Autumn and Spring with a view to its destruction. An almost certain protection against its attacks may be had by heaping two or three quarts of air-slaked lime about the body of the tree in the month of May, first removing the earth a little from the surface. We would by no means recommend ashes for this purpose, for we have seen great injury result from it, in consequence of their caustic property being so readily soluble. It is thus brought by the rains into active contact with the bark and destroys it. We have seen even leached ashes produce this result.

The Peach in this country is almost universally grown upon its own stock. We have, however, some most beautiful trees of our own cultivation, worked upon the Plum stock. This renders the tree harder, by restraining somewhat its natural luxuriance of growth; secures it from the attack of the borer; and gives it a more compact and dwarfish habit.
Alberge Yellow, or Bernard's Yellow.—Large, fine yellow, juicy, and rich, with red cheek. Vigorous and productive. 1st of Sept.

Bergen's Yellow.—Large, orange with deep red cheek, juicy and high flavored. Vigorous and productive: one of the best. Sept.

Brevoort, or Brevoort's Morris.—Large, pale straw color with a red cheek; very sweet, with a fine flavor. Fair bearer. Sept.

Cole's Early Red.—Medium, red mottled, juicy, rich, with a pleasant fine flavor. Vigorous grower, and good bearer. Aug.

Coelelodge's Favorite.—Above medium, nearly white, with red dots and brilliant scarlet cheek; very melting and juicy, with a rich flavor. Middle of Aug.

Crawford's Early Melocoton.—Large, yellow, very juicy, rich, beautiful, and magnificent; ranks high. Vigorous and productive; very popular. Early in Sept.

Crawford's Late Melocoton, or Crawford's Superb.—Very large, yellow, rich, juicy and vinous. Very productive; ranks among the finest as a late variety. Last of Sept.

Druid Hill.—Large, greenish white, clouded with red; very juicy and rich, with a high vinous flavor. 1st of Oct.

Early Tillotson.—Medium, white ground, deep red in the sun; juicy, rich and high flavored. Middle of Aug.

Early York, Serrate Early York.—Medium to large, greenish white dotted with red; rich, tender and full of juice. Good grower and bearer; one of the best. About 15th of August.

George EV.—Large, nearly white with a red cheek; melting, juicy, rich and excellent. Crops moderate, one cause of its excellence. Last of Aug.

Grosse Mignonette, or Royal Kensington.—Large, white with a pale red cheek, juicy with a very rich, high, vinous flavour. Good grower and bearer. Latter part of Aug.

Haine's Early Red.—Large, white with a red cheek, juicy and delicious, very productive; considered among the best. 15th of August.

Heath Cling.—Very large, yellowish white, red next the sun, exceedingly juicy, becoming melting, with a high rich, vinous flavor; does not succeed well too far North. Middle of Oct.

Jacques' Rareripe.—Very large, deep yellow, shaded with red; has a high reputation. Last of Aug.

Large Early York.—Large, nearly white with a deep red cheek, fine grained, very juicy, mild and rich. Vigorous and productive; one of the best. Last of Aug.

Large White Cling.—Large, greenish white with a red cheek; very juicy, sweet, rich and high flavored. Productive, and much esteemed. Middle of Sept.

Lemon Cling.—Large, lemon shaped, yellow with a brownish red cheek, rich vinous and sub-acid. Productive. Last of Sept.

La Grange.—Large, greenish white, red cheek, juicy, rich and sweet, with a fine flavor; does not do well too far North. 1st of Oct.

Morris White.—Medium, straw colour, tinged with red, flesh white, juicy and delicious. Good bearer and desirable. Middle of Sept.

Nivette.—Large, yellowish green, with a red cheek; juicy and melting, with a very rich flavor; one of the best of its season for the North. Ripens with the Morris White, or a little before.
APRICOTS.

Old Mixon Cling.—Large, yellowish white with a red cheek; juicy and rich, with a high flavor. This is one of the very finest of cling stone peaches. Last of Sept.

Old Mixon Free.—Large, pale yellowish white, with a deep red cheek; tender, rich and excellent. Succeeds well in all localities, and has few equals in the North. 1st to 15th of Sept.

Royal George.—Medium to large, white, with a fine red cheek, juicy and rich. Moderate bearer. Last of August. Pronounced only second rate by the Buffalo Convention.

Red Cheek Melocoton.—Large, yellow, with a red cheek; juicy and rich, with a vinous flavor. Fine bearer, very popular, and a good orchard variety. Sept.

Red Rareripe, Morris’s.—Large, white with a rich dark red cheek; juicy, rich and high flavored. Last of Aug.

Snow Peach, Medium, creamy white, both skin and flesh; juicy, sweet and rich. Very desirable for preserving. 1st of Sept.

White Imperial.—Large, yellowish white with light purple next the sun; very juicy, delicate, sweet and excellent. Good bearer, and valuable at the North. Last of Aug.

### APRICOTS.

The Apricot is a most beautiful and delicious fruit, ripening just before the Plum. It is highly ornamental, both in the spring, with its luxuriance of early blossoms, and in the summer, with its load of golden fruit. It is hardier when grown upon the Plum stock. The shortening-in system is as important as with the Peach. For the Curculio, see the Plum.

**Breda,**—Small, dull orange, marked with red, juicy, rich and vinous. Good bearer, and hardy. 1st of Aug.

**Early Golden,**—(Dubois’s,) Small, pale orange, juicy, and sweet. Hardy and productive; fine orchard variety. First week in July.

**Hemskirkc,**—Large, orange with a red cheek; rich, juicy and sprightly; resembles Moorpark; somewhat smaller but earlier.

**Large Early,**—Large, orange with a red cheek, sweet, delicious and excellent. Vigorous and productive. 1st of Aug.

**Moorpark,**—One of the largest; orange with a brownish red cheek, firm, quite juicy with a rich high flavor. Very productive. Aug.

**Peach,**—Very large, yellowish orange with a darker cheek; juicy with a rich high flavor. Ripens with Moorpark, which it resembles, but is somewhat larger.
Purple, or Black Apricot.—Small, or medium, pale red, deep purple in the sun, or nearly black; sweet with a pleasant good flavor, distinct from the other varieties; remarkably hardy and adapted to the North. Ripens in August with the Breda.

White Masculine.—Small, nearly white, with a reddish cheek; flesh white and delicate; resembles Red Masculine, except in color, and is rather better. Hardy, and very early, about 20th July.

NECTARINES.

The Nectarine resembles the Peach in every thing, except that its fruit is entirely smooth. Its culture, maladies, and their treatment are precisely the same, and we refer the reader to our remarks under the head of the Peach.

Its skin being free from the downy covering of the Peach exposes it to the attack of the Curculio. For the most effectual way to exterminate this destroyer, see the Plum.

PRICE OF TREES, 25 CENTS EACH.

Boston,—Large, bright yellow with a red cheek; sweet and pleasant. 1st of Sept.

Downton,—Large, pale yellow with a dark cheek; rich and high flavored; said to be one of the best. 1st of Sept.

Early Violet,—Medium, dark purple with a red cheek and brown dots; melting, rich, high flavored and aromatic; of the finest quality. Last of Aug.

Elruge,—Medium, pale yellow with a dark red cheek; juicy and high flavored. Much esteemed. 1st of Sept.

Early Newington,—Large, pale green, red in the sun; juicy and rich, with a fine flavor. 1st of Sept.

Hunt's Tawny,—Medium, yellow, with a red cheek; rich, juicy and good. Valuable on account of its earliness. 1st of Aug.

Hardwick Seedling,—Large, pale green with a dark cheek; juicy, agreeable, melting and rich. Last of Aug.

New White,—Rather large, white with a tinge of red; tender, juicy, rich and vinous. First of Sept.

Red Roman,—Large, greenish yellow with a dark reddish cheek; firm, rich, vinous and high flavored. 1st of Sept.
QUINCES.

PRICE, 25 TO 50 CENTS.

Apple, or Orange,—Large and roundish, bright golden yellow. Very productive, and extensively cultivated.

Pear-Shaped,—Handsome and good.

Portugal,—More oblong than the first, but of a better quality. Not so productive.

Chinese and Japan Quinces,—Will be found under the head of Ornamental Shrubs.

GRAPES.

SELECT HARDY KINDS.

PRICE. 4 years old, ............................... 50 cents
" 2 to 3 years old, ............................... 37 1-2 "
" 1 year old, ........................................ 25 "

Catawba,—One of the very best (if not in too northern a latitude) for the dessert and for wine; bunches and berries large; juicy, sweet and musky. Very productive.

Clinton,—A very hardy, native variety, ripens before the Isabella and Catawba, from two to three weeks, but inferior to them in quality.

Diana,—A new variety, said to be fully equal to the Catawba, but ripening earlier.

Isabella,—The very best for northern latitudes, bearing immense crops; bunches and berries large, black, juicy and sweet.

We have the Ohio, or Segar Box, Fisher's Black, and Lenoir, but do not recommend them.

SELECT FOREIGN GRAPES.

Price, from 50 to 75 Cents.

Black Franckenthal,—Produces abundantly. The handsomest and best of fruit.

Black Cluster,—Small, black, sweet and good; one of the hardiest and best for outdoor culture.

Black Hamburgh,—A general favorite, bunches large and shouldered; berries large, black and delicious.
BLACK PRINCE.—Large, black; bunches long, berries sweet. A great bearer.

CHASSELAS DE FONTAINEBLEAU.—One of the most esteemed in France; bunches large, berries large, greenish white, a little redden. Very productive.

CHASSELAS DE FLORENCE.—A new variety just received, said to be unrivalled in France.

FEAST'S NEW WHITE.—This is a grape raised by Mr. Jno. Feast of Baltimore, Md., from seed, of which he speaks very highly. We will exhibit the fruit as soon as practicable in order to have it properly tested.

FROD LABONLAIE.—One of the most esteemed in France.

GOLDEN CHASSELAS.—This is supposed to be the same as CHASSELAS DE FONTAINEBLEAU.

GRISLY FRONTIGNAN.—This is said to be one of the most delicious and beautiful of grapes; bunches long; berries medium; color red and purple in the sun.

HERBEMONT CLUSTER.—Said to be hardy.

MILLER'S BURGUNDY.—Sweet and good.

PURPLE FONTAINEBLEAU.—New.

ST. PIERRE DE L'ALLIER.—(Saneti Petri.) Said to be one of the very best in France.

WHITE SWEETWATER.—Bunches fair size, berries green, sweet and watery.

WHITE FRONTIGNAN.—Later than the Grisly Frontignan; bunches large, berries green changing to amber; rich and musky.

Also the following; Madeira, Muscat Hative, Palestine, Purple Constantia, Reine de Nice, Royal Muscadine, Syrian, White Muscat of Alexandria, White Syrian, Yellow Provence.

A part of the above choice kinds will not be for sale until next year.

MINOR FRUITS.

CURRANTS.

This refreshing and useful fruit is every where cultivated, or rather perhaps, suffered to grow, no pains being taken generally to improve the appearance of the bush, or the quality of the fruit. The mode of training now most frequently recommended is to keep them in the form of trees, with a clean stem of one or two feet high surmounted by a round branching head. If grown in this way, the annual shoots should be shortened-in, and the superfluous limbs thinned out. This renders it ornamental and conduces to the greater size and excellence of the fruit.

The Currant is much used for culinary purposes in the green or ripe state.

Its brilliant and zest-giving jellies and jams are prepared bountifully for the exigencies of Thanksgiving and the Holidays by every good housewife; and they often contribute a grateful refreshment to the thirsty longings of the invalid. A remedy peculiarly adapted to the relief of sore throats is afforded by a jelly made of the Black Currant.

Each. Doz.

CHERRY.—Said to be the largest of all Currants, dark red and very fine; ripens with Red Dutch. 37 1-2c.

RED, DUTCH.—A well known variety. 8 $ .75
GOOSEBERRIES AND RASPBERRIES.

**Red, Knight's Sweet,**—Similar to Red Dutch, said to be more mild. .................................................. 20 2 00

**Victoria,**—Very large, bunches said to be 6 inches long. .............. 25 2 50

**White Dutch,**—Milder than the Red, .................................. 12 1-2 1 00

**White Grape,**—The largest white currant, .......................... 37 1-2

**Missouri Yellow Flowering,**—Ornamental, fine yellow fragrant flowers. ........................................... 25 2 00

**Scarlet Flowering,**—Beautiful, ........................................... 25

---

**GOOSEBERRIES.**

We have imported the best Lancashire varieties from the best growers in England. They require a deep, rich soil, and the roots should be kept moist by mulching. Annual pruning to an open head is necessary to ensure a good crop of fine fruit. Our collection comprises the best Red, White, Green and Yellow varieties, amounting to some four dozen sorts.

**Price, single,** .................................................... 20c each.

**dozen,** .............................................................. $2 00

**Amongst them are the following leading sorts:**

**Yellow,**—Bunker Hill, Early Sulphur, Golden Fleece, Yellow Ball, &c.

**Green,**—Jolly Angler, Greenwood, Green Hairy, Jolly Tar, Green Walnut, Glinton Green, Green Ocean, Green Gage, Heart of Oak, Profit, &c.

---

**RASPBERRIES.**

The Raspberry requires a good soil, and the dead wood should be cut out every year, leaving five or six strong canes in each hill.

**Antwerp Red,**—True. This is a most excellent variety, .............. 6c. $ 50

**Antwerp Yellow,**—Similar to preceding, except in color, .............. 6 50

**Franconia,**—Fruit large, purplish red, fine. .......................... 15 1 50

**Fastolff,**—Fruit very large, purplish red, and quite hardy. .......... 15 1 50

**Large Fruited Monthly,**—(New.) Bears from Aug. to Nov. ........... 25 2 00

**Orange,**—(Seedling of Dr. Brinckle of Philadelphia,) Color light buff, large, highly flavored and productive, .............................. 50

**Cushing, or Col. Wilder,**—(Seedling of Dr. Brinckle of Philadelphia,) Color red, fruit large, and of fine flavor. Robust habit, ........... 50
SELECT STRAWBERRIES.

They require a deep, rich, loose soil. They can be planted either in the spring or in the months of August and September. They are usually planted in rows about two feet apart, and one foot to eighteen inches in the rows. Many protect their beds with coarse litter or manure during the winter, but we have seen very fine crops raised without any protection whatever.

The following comprise the leading varieties.

ORNAMENTAL TREES.

Price of Ordinary Sized Trees, (Except otherwise noted,) . . . . . . . . 50 cts.
Larger Sized Trees, charged for in proportion.

Abele, Snowy Maple Leaved,—Rapid grower, foliage large and glossy above, white and woolly beneath. 25c. to 50c.

Almond, Large Double Flowering,—Blooms in April, has double blossoms, like roses. 25c.

Ailanthus, Tree of Heaven,—An erect, rapid growing tree, with long pinnated leaves. 25c to 50.

Ash, Golden Barked,—(Fraxinus Aurea,) A curious variety, irregular habit. 75c.
— Gold Barked Weeping,—(Aurea pendula,) a new variety with drooping branches. 75 to $1.50.

Acacia, Weeping,—Has drooping branches. $1.00.
— Umbrella or Globe,—Thornless; this variety is distinct, forming a perfectly globular head with a dense mass of foliage. $1 to $1.50.

Bird Cherry,—Fine, rapid grower with glossy foliage; has long handsome branches of white flowers. 50c.
— Variegated,—This has a variegated foliage, quite distinct. 50c.

Catalpa, Makes a fine head, with large heart shaped foliage and flowers, very handsome in July. 25c. to 50c.

Cherry, Large Double Flowering,—An erect growing variety with double blossoms. 50c.
— Dwarf Double Flowering,—Similar to the preceding, only smaller. 50c.
— Large Weeping,—An imported variety with drooping branches and black fruit. $1.
— Small, or Willow Twig'd,—Has a compact round head, with slender drooping branches, and small leaves and fruit. $1.

Cypress, Southern,—A beautiful tree with small neat foliage like the Yew.
Elm, American,—With graceful drooping branches.
Horse Chestnut, White Flowering,—Large, round, dense-headed tree, with dark green foliage and large spikes of showy white and red flowers in June. 50 to 75c.
— Scarlet Flowering,—With red or scarlet flowers. 75c to $1.
— Double Flowering,—75c to $1.
— Laciniated Leaved,—New, very handsome. $1.
— Variegated Leaved,—Quite new and beautiful. $1.
ORNAMENTAL TREES.

Japan Ginkgo,—(Salisburia adeanti folia) Fan like foliage. $1.

Judas Tree,—Grows about 15 to 20 feet high, has large roundish, deep green leaves. We also have a variety with white flowers.

Laburnum, or Golden Chain,—A beautiful tree with long pendant bunches of yellow flowers. 25c.

Larch, European,—A rapid growing, pyramidal tree, with pendant branches. 37 1-2c.

Magnolia, Umbrella Tree,—A lofty growing tree with immense leaves and large white flowers in June.

— Chandelier, or Yulan,—(conspicua) A Chinese variety with large white flowers covering the tree completely before the leaves expand. $1.

— Gracilis,—Crimson, twice flowering. Splendid. $1.

— Soulange’s,—Very fine, has white and purple flowers. $1.

— Swamp Laurel, or Glaucus,—A small tree, indigenous to Maryland, with shining leaves and very fragrant blossoms in May and June.

Maple, Sugar,—A native forest tree, fine form and growth, with beautiful foliage.

Mountain Ash, European,—A medium sized tree, with a regular dense head and has large clusters of showy reddish-yellow berries.

Mountain Ash, American,—Similar to the above, but of a more spreading habit, foliage larger with scarlet berries.

Peach, Double Flowering,—Has beautiful red blossoms, one dense mass of flowers.

Pawlonia, Imperial Japan,—A very thrifty, rapid growing tree from China, with immense leaves, much admired.

Sloe, or Double Flowering Plum,—Has beautiful double white flowers, and when in full bloom has the appearance of many wreaths.

Sophora, Japan,—A beautiful tree with dark green bark and leaves, has white flowers. 75 to $1.

— Weeping,—A splendid drooping variety with long slender branches, and dark green bark. $1 to 1 25.

Tulip Tree,—A magnificent native tree, with glossy foliage, and fiddle-shaped leaves; has tulip like flowers and belongs to the family of Magnolias.

White Fringe Tree,—(Chionanthus Virginica,) Handsome foliage and fine spikes of delicate white flowers.

Willow, Weeping,—Too well known for description; one of the most graceful amongst trees. 25 to 50c.

— Ring Leaved,—A curious variety with curled leaves. 25 to 50c.

— Golden,—Showy, with its bright yellow bark, when bereft of foliage. 25 to 50c.

We can supply seedlings and small trees of some of the above by the 100 or 1000 to nurserymen or vendes.
ORNAMENTAL EVERGREEN TREES.

Price 50 cents, except where noted.

**Arbor Vitae, American,—** A large pyramidal tree with deep green foliage.

**Chinese,—** A smaller tree than the preceding with lighter green foliage.

**Cedar, White,—** A fine evergreen tree, of large size.

**Red,—** Dark foliage and well adapted for hedges and screens.

**Indian, or Deodar,—** (Cedrus Deodara.) One of the most admired and graceful of all evergreens; hardy and of rapid growth, branches drooping, foliage light bluish green; in pots 2 feet high. $1; 4 to 6 feet high, $2.

**of Lebanon,—** Much admired, and of great celebrity. 4 to 6 feet high, $2.

**Japan, or Cryptomeria,—** The Queen of Evergreens, a native of China; attains a great height, rapid grower with very graceful drooping branches. It is thought to be hardy. $2.

**Fir, American Silver, or Balsam,—** A very erect pyramidal tree with dark green foliage.

**European,—** A magnificent tree, easily distinguished from the preceding.

**Pinsapo, or Mount Atlas Cedar,—** An elegant tree with sharp pointed dark green leaves all around the branches; quite hardy; in pots $1 to $2.

**Juniper, Swedish,—** A small sized pyramidal tree, with bluish green foliage, very hardy and ornamental.

**Pine, Chili,—** (Auracaria Imbricata,) A splendid variety of Pine from South America. It has spreading branches, thick, leathery, short pointed leaves, and attains a large size. Not yet sufficiently tested as to hardiness. Plants in pots 1 to 3 ft. high, $2 to $4.

**Brazil,—** (Auracaria Brasiliensis,) $2.

**White, or Weymouth,—** (Strobus,) A rapid growing native pine, with light green foliage.

**Austrian,—** (Austriaca,) Black Pine, a hardy robust spreading tree; leaves long and dark green, but large and grey, grows rapidly and is quite distinct.

**Cembra,—** (Cembra,) Siberian stone, a distinct European species, of compact form, foliage short and silvery; grows slowly while young; in pots, $1 to $2, according to size.

**Bhotan, or Lofty,—** (Excelsa,) A graceful tree with drooping silvery foliage in large tufts at the ends of the branches, a rapid grower and perfectly hardy, from the Himalayan Mountains. In pots, from $1 to $1.50.

**Scotch,—** (Sylvestris,) A fine, robust, rapid growing tree, which succeeds well in this country, leaves of a silvery green. 50c to $1.

**Short Leaved Nepal,—** (Gerardii,) new. $2.

**Haleppo,—** (Halepensis.) 50c to $1.

**Remarkable,—** (Insignis,) New. $2.

**Lambert’s or Gigantic,—** (Lambertiana,) New. $2.

**Corsican,—** (Laricio,) 50c to $1.

**Short Leaved Weymouth,—** (Monticola,) New. $2.

**Cluster,—** (Pinaster,) 50c.

**Stone,—** (Pinea,) 50c; and **Russian,—** (Rigensis,) 50c.
HEDGE PLANTS.

Spruce, Norway.—(Excelsa,) A lofty elegant tree, with drooping branches when it attains a medium height.

— White.—(Alba.) A tapering pyramidal tree.

— Douglas's—(Douglasii,) New, great grower, erect and conical, leaves narrow and flat, dark green above, and silvery beneath. $2.

— Hemlock, or Weeping.—A beautiful pyramidal tree with drooping branches and delicate dark green foliage.

— Himalayan, or Smith's.—(Morinda,) New, a noble and elegant tree recently introduced, has the character of the Norway Spruce, but more graceful and drooping; in pots, $1 to $1.50.

HEDGE PLANTS.

To form neat divisions in pleasure grounds, or as a partial screen giving an effective relief to the palings in front, the Privet, by reason of its easy cultivation, and rapidity of growth, is perhaps best adapted of all hedge plants to general use. The Hemlock, Red Cedar, and Arbor Vitae are often used for similar purposes, and are exceedingly beautiful, but it is a work of time and patience to bring them to perfection.

For farm hedges the Buckthorn is preferable to any other in use amongst us. Mr. Downing in expressing his preference for it, remarks, "It will grow in any soil, makes a thick hedge with very little time or labor, needs clipping but once a year, and may be trimmed when the leaves are off, at any time when the farmer has least to do. Besides this, it is less liable to be attacked by disease, insects or vermin, than any other hedge plant in our knowledge, and may be raised from seed as easily as peas. It is a little wanting in thorns when young, but gets stiff enough to turn cattle when it has been sheared three or four years."

Buckthorn,—2 years old, fine, $5 pr. 1000.

" 3 " " extra, $7 " do.

Privet.—2 and 3 " fine plants, $15 to $20 pr. 1000.

Arbor Vitae, or White Cedar.

Hemlock.

Red Cedar.

Norway Firs, &c., &c., in quantity.

Dwarf Box, for edging, 25 cts. per yard.

EVERGREEN SHRUBS.

Price, 50 cents, except where noted.

Aucuba Japonica,—(Gold dust tree.) A beautiful shrub with long shining gold blotched leaves.

Broom, Scotch,—Has beautiful yellow flowers in June.

Box, Dwarf,—For edging, per yard 25c.

—Tree, or Common.

Cotoneaster, Box-leaved,—A low spreading shrub with box-like foliage and white flowers.

Euonymus, Foliis Aureis,—Gold striped.

—Argenteus,—Silver do.

European,—Variegated.

These are pretty shrubs with variegated foliage.

Holly, or Ilex,—Small upright, $1.50.

—Sekhodi’s, Japanese, $1.50.

—American; a most beautiful and desirable evergreen; form always fine. 75c.

ORNAMENTAL SHRUBS.

Price, 25 to 50 cents, except where noted.

Alchemilla, or Rose of Sharon.—A spreading shrub, producing clusters of rose-colored blossoms during the season, 50c. to $1.50.

Althaea, or Rose of Sharon.—

—Double variegated.

—White and purple.

—Double purple.

—Double blue.

—Bicolor, red and white, Anemone flowered.

All highly ornamental, and bloom profusely during the autumn.

Almond, Dwarf Double.—Flowers like small peas, 25c.

Amorphism, or Hardwood Indigo,—Has long spikes of fragrant flowers.

Calycanthus, Alspice Tree, or sweet scented Shrub,—Wood and flowers exceedingly fragrant, of a chocolate color; very desirable.

Colutea, or Bladder Senna,—Yellow flowering, with delicate foliage.

Corkhonnor, or Japan Globe Flower,—A slender Shrub with globular golden flowers, $2.50.

Cotoneaster Affinis.—A fine Shrub with smooth leaves and white flowers, blooms early.

Box-Leaved.—A low trailing species.

—Uva Ursi,—Dwarf also, but larger than the preceding.

Cytisus, or Laburnum, Tripflowered,—A dwarf spreading Shrub with yellow flowers and quite pretty.

—Weeping,—A slender branched, pendulous Shrub with purple flowers; grafted on the common Laburnum, 5 ft. from the ground, forms a beautiful weeping tree for the lawn.

Also Althaea, Eryngium, or Sickle Podded; White Flowering; Prostrate Flowering; Purple Flowering; Senticized; and Weldia’s.
ORNAMENTAL SHRUBS.

Curcuma, Yellow Flowering,—Bunches of sweet yellow flowers. 25c.

Crimson Flowering,—Single.

Cordonia,—A hybrid, with bunches of crimson and yellow flowers; blooms profusely in May.

Double Red Flowering.—Beautiful.

Forsythia Viridissima.—A new deep green shrub from China, a rapid grower and free bloomer, with yellow flowers.

Fringe Tree, Purple.—A much admired shrub; has curious fringed, or hair like flowers, that cover the whole plant. Very desirable.

- Pallida.—Pale flowered.
- Scarlet Trumpet Monthly.—Superb bloom; leaves and blossoms longer than the preceding.
- Canadian.—A robust grower, with large glaucous leaves and yellow flowers.

Ivy, New Giant.—An evergreen, somewhat tender, with large deep green foliage.

**SELECT ROSES.**

The great demand for this class of shrubbery, has induced us to give the greatest attention to its culture. With this view, we have imported very largely during the present season, and particularly of the choice new Perpetuals.—Besides a great number which we keep in pots, to accommodate our customers at any season of the year, we design to plant out very extensively both in number and varieties, during the ensuing Spring.

**HARDY SUMMER ROSES.**

**PRINCIPALLY HYBRID CHINA,**—Price 30 to 40 cts. each; $3 to $4 per doz. in varieties.

Perpetual Red,—(Mauveet.) Rosy crimson, double and fine; rather delicate, $1.

We invite particular attention to the above perpetual mosses.

CLIMBING ROSES.

Price, 50 cents, except where noted.

This list comprises all the running roses, concluding with the twelve new varieties of Joshua Pierce, of Washington City, the finest of all for trellises, walls, and screens. They are perfectly hardy, rapid growers, with luxuriant foliage, bearing immense clusters of beautiful flowers, of all shades; and, like the Kentucky Multiflora, continue their blooming to a very late period. They are particularly desirable to all who wish for splendid climbers. We believe that the whole class is for sale by very few, in the North, except Messrs. Howe & Co., of Boston, and ourselves.

Amadis, or New Crimson,—Deep crimson, rapid grower.
Blush Boursault,—Blush, pink centre, vigorous; 25 to 37 1-2 cents.
Blush Ayrshire,—Delicate blush, rapid grower; 37 1-2 cents.
Common Michigan,—Very rapid climber; single; 25 cents.
Elegant,—Rose, changing to blush; very vigorous; 37 1-2 cents.
*Felicite Perpetuelle,—Creamy white, small and double; very handsome; 37 1-2 cents.

*These are not perfectly hardy, although some of them succeed, without any protection, with but little injury. They will well repay for any extra trouble.

The three following DOUBLE MICHIGAN, or PRAIRIE ROSES, originated with Mr. Samuel Feast, of Baltimore, Maryland, and are all hardy.

Baltimore Belle,—Pale blush, nearly white, full and double in large clusters; rapid grower, and very fragrant.

Beauty, or Queen of Prairies,—Bright rose red, with a white stripe in the centre of each petal, very large and globular, and an immense bloomer.

Perpetual Pink,—Deep pink changing to purple; blooms sometimes in autumn.
PERPETUAL ROSES.

The twelve following varieties originated with Mr. Joshua Pierce, of Washington city; all full double and hardy.

Anna Maria.—Pink, with rose centre, cupped, full double, beautiful large clusters of 30 to 50 flowers, quite distinct.

Eva Corinne.—Very delicate blush, with beautiful centre, globular and very double; 10 to 20 flowers in a cluster, and quite fragrant; very desirable.

Jane.—Large rose, unbranched and very double; clusters large, 25 to 50 flowers in each. Very robust.

Linnaean Hill Beauty.—Pale blush, very fine, and much admired; clusters large and full.

Mrs. Hovey.—Splendid blush and beautiful clusters, large, of superb habit and splendid deep foliage. Parsons says sometimes pure white. Sets.

Mrs. Pierce.—

Miss Gunnell.—Elegant, delicate blush or buff; clusters from 25 to 30 flowers. One of the best.

President.—Blush, with rose centre, compact, vigorous, 13 to 30 flowers in a cluster.

Pride of Washington.—Very dark rose, fine form, cupped, resembling Jane, vigorous, clusters of about 25 flowers.

Ramlemulina.—Pale blush, very handsome, large clusters of about 25 to 30 flowers, slightly fragrant and late bloomer.

Triumphante.—Deep brilliant rose, imbricated; clusters large, 20 to 30 flowers; foliage large and deeply serrated; a remarkable variety.

Virginia Lass.—Splendid blush in large clusters.

PERPETUAL, OR EVERBLOOMING ROSES.

We would here beg leave to state that we have procured from the most celebrated Rose growers, both in England and France, every thing of merit, and such only as have passed the criticism of the best of judges. We particularly invite the attention of all amateurs and others desiring roses, to our list of Perpetuums and Bourbons, feeling confident that they embrace every thing of real merit, both European and American. We are among the first to import any thing that will be a decided acquisition, and have now a standing order for the new great blue rose. Our prices are as low as the new varieties can be afforded, and the older sorts are put much lower than usual.

This is the most desirable class of all the roses, being perfectly hardy, and having the quality of blooming during the fall season. They are of vigorous growth, fine foliage, and rich in their colors ranging from pure white to deep brilliant scarlet, and even very dark purple, or almost black, as Ebeue. We present here a great many new ones of high reputation in England and France, and which we have imported the present season from these places.

Price, 37 1-2 to 50 cents, except where noted.

By the dozen as low as they can be procured any where.

Admiral D’Estaing.—New; clear rose; 75 cts.

Ann de Bretagne.—New; full coral rose, deep rose, very handsome and desirable; $1.

Alphonse Karr.—New; full rose carmine, beautiful; $1.

Amanda Patenot.—Pale rose, large and full.

Antigone.—Deep, changent to rose; large.

Arcicie.—Bright rose, large, globose.

Augustine Mouchet.—Deep purplish red; blooms in clusters, large and full.

Baron Prevost.—Deep rose, large and full, superb.

Baronne Hallete de Chaparede.—Full, brilliant carmine, most splendid, very rare and beautiful. A Seedling of Madame Laffay, elegant foliago, and same habit; flowers larger, more double and petals much thicker; $2.

Beranger.—New; large, full, globulous, purplish crimson rose; very fine; $1.

Blanc de Vire.—Pure white; a fine rose, but rather shy bloomer; 75 cents.

Captain Renard.—Superb rose.

Caroline de Sansel.—New; has bloomed magnificently in the Chestnut nurseries, blush with rose flesh centre, large and full as Baron Prevost; most splendid; $2.

Casimir de Lavigne.—New; full, reddish violet crimson, beautiful; $1.

Chereau.—New; beautiful cherry color, gradually changing to rose; has flowered well; $1 50.

Clementine Syringa.—Dark clouded rose, large and full.

Compte de Beranger.—Bright rose, large and full, very vigorous and fine; 75 cents.

Compte Robinson.—A remarkable rose, brighter in color than Count de Bataille, and the nearest approach of any to scarlet; $2.

Compte d’Egmont.—New; fine rosy purple; $1.

Comtesse de Rambuteau.—New; full, beautiful rose; 75 cents.

Counoune de Beranger.—New; a purplsh crimson rose, distinct, large and full, one amongst the best received; $1.

Comtesse Duchatel.—Bright rose, fine form, and full; 75 cents.

Delphina Gay.—Full white, incarnate, blooms in clusters, beautiful; 75 cents.

Dembrowski.—New; full, deep crimson violet, very beautiful and desirable; $1 50.

De Neullery.—Reddish carmine, fine; 75 cents.

Dr. Marx.—Rose carmine, full, large, and superb.

Dr. Marjolin.—Fine cherry color; 75 cents.

Duchesse de Rohan.—New; deep rosy lilac, fine; $1.

— de Gallarie.—Full rosy carmine, very beautiful and desirable; $1.

— de Praslin.—Entirely new, one of the very handsomest of roses, and a great novelty, of fine size, very full, petals inside clear rose, outside pure white—a decided acquisition. Cost us 16 francs, in France; $1.

Duchess of Sutherland.—Pale rose, large, full, and double; very fine.

— of Montpensier.—Full, clear, large, dark rose, very fine indeed; $1.

Dr. Lindley.—Bright red, dark centre, large and full.

Du Roi.—Bright crimson, very fragrant.

Earl Talbot.—Large, deep clear rose; 75 cents.

Ebeue.—Superb deep crimson purple, the darkest rose known; $1 50.

Eliza Vilmorin.—New; deep red at the exterior, incarnate at the centre, full double and very fine; $1 25.

Emma Dampierre.—Fine rose; very full.
Edward Jennie.—Lilac rose; large and beautiful.

MUSK SCENTED ROSES.

Herbemont Cluster,—Blush flowers in large clusters; free bloomer; 37 1-2cts.
Princess of Nassau,—Yellowish white; very double; constant bloomer in large clusters; 75cts

SCOTCH ROSES.

With Names, &c., 25 to 75 cents each.
NOISETTES.

This is a splendid class of Roses, and justly admired by all. The characteristics are profusion of flowers in immense clusters (some of which combine as many as fifty) and great variety in size, some being small, while others are very large indeed. The large and magnificent yellow varieties heretofore produced—Solataire and Chromatella—formed quite a new feature in this very desirable class; but while they were splendid roses, they were shy bloomers, with very small clusters, and frequently single at the terminus of the branches or shoots. Another important particular in which they were lacking, especially the Chromatella, was fragrance. We have the pleasure, however, to state, that we have a fine seedling rose called "Augusta," which has been tested now for three seasons, that is as vigorous as the Double Michigans, combining all the qualities of Chromatella, a very free bloomer in fine clusters, and which cannot be exceeded in fragrance by any rose in the world.

The Noisettes possess the same property of blooming through the summer and autumn as the Bourbons, Teas, and Chinas; and the flowers of almost every variety are of cupped form. Most of them are hardy, and others nearly so, requiring but slight protection. Some of them have long flexible shoots well adapted to training to columns, greenhouses, or the sides of buildings. We ask attention to the following list of splendid varieties comprising every thing new that is worthy of cultivation.

Price, 37 1-2 to 50 cents, except where noted.

Ami Vibert—Pure white; blooms in clusters; one of the hardiest.

Augusta—Our new seedling. This is the most robust in habit of all the noisettas, putting up strong shoots in a single season from 20 to 25 feet, resembling the double Michigan in growth. Its foliage is of the largest size: deepest green above, and beautiful red underneath; margined with a deep purple stripe, and quite serrated; its flowers are exceedingly large; full double; of a beautiful soft yellow, and of most exquisite fragrance; blooming freely in fine clusters throughout the whole season. A beautiful rose. This rose does not require the early buds to be pinched, but flowers freely from spring to fall; sending out new shoots continually, which are crowned with clusters of splendid flowers. The names of all those who order it are placed on our list as they are received and strong plants will be sent to them as soon as we let it out. Price $3 each, or $20 per dozen.

Carmine Cluster—Carmine, free bloomer.

Caroline Marnissae—New; full white inarinate; ranks in England as one of the best; $1.50.

Champney's—Blush; blooms profusely.

Clara Wendel—Aurora changing to straw color; 75c.

Conque de Venus—White with roseate centre.

Chromatella—Deep yellow, large and beautiful.

Delepine—New; fine yellowish white; $1.

Euphrosyne—Yellowish rosy; clustered.

Feastii—Beautiful white in fine clusters; superior to Ami Vibert; $1.

Fellenger—Brilliant crimson.

Frankliana—Sold to be very fine indeed; 75c.

Fleur d'Age—Large white; rose centre; very fragrant; 50c.

Jibrains Despres—Large, bright rosy fawn color.

Julie de Lrayes—Small white, full double.

Jeanne Soutre Muscat—Creamy yellow, and very sweet; 75c.

Lalis—New; a pretty novelty; color pure white, flowers medium, but full and of fine form; beautiful; $1.

Lamarque—Pale lemon yellow, large and fine; 75c.

Monstroza—Fine lemon; very large; cupped.

Ophire—Bright salmon or fawn; fine; 75c.

Octavie—New; fine reddish purple, extra; $1.

Phale—New; large full white, shaded with rose; said to be superb; $1.

Solitaire—Saffron yellow, large and fine; 75c.

Titevina—White, with a yellowish rose centre; very pretty and fine; 75c.

CHINA, OR BENGAL ROSES.

This class is desirable and fine for the open ground, filling up the entire season with a profusion of bloom. In their habit, they are comparatively dwarfish. Their flowers are mostly cupped; a few are globular. They commence flowering in April, and in the open ground continue a constant succession until arrested by frost. If potted and housed, they will continue to bloom throughout the winter months. They are all tender, and require protection. When not taken up, we find the best preservative to be a covering of litter, or one or two inches of soil.

Price generally 37 1-2 cents each.

Agrippina—Rich velvety crimson.

Belle de Monza—Rose, changing to crimson.

Carmine d'Yeales—Deep carmine; superb.

Cels—Blush; large and profuse bloomer.

Citoyen de deux Mondes—New; full, deep purple; very fine; 75c.

Hamilton—Fine rosy purple.

Madame Breton—Beautiful rosy purplish crimson; 75 cents.

Nemesis—Shaded velvety brown.

Prince Charles—Bright Carmine.

Pompe de Tyre—Violet purple. (With some, a Noisette.)

Sanguine—Dark red, with a white stripe.

Vanilla—Dark rose; fine.

Virginal—Incorporate white; beautiful.
TEA ROSES.

These Roses are particularly esteemed on account of their exquisite odor, denominated tea-scented. Their properties are the same as the preceding, and they require the same treatment. Some of them are less vigorous than the Bengals, while others are of great vigor. They are not so vivid in color, but have more delicate tints, and combine among their varieties the shades of orange, cream and yellow.

Prices generally from 37 1/2 to 50 cents each.

Adam,—Brilliant pink.
Bougere,—Large, bronze rose; fine.
Bousilene,—Large, changeable purple.
Caroline,—Bright rose, yellow base.
Clara Sylvia,—Pure white; superb.
Comte de Paris,—Rose incarnate; fine; 75c.
Devouleus,—Straw, buff centre.
Bic d'Orleans,—Bright shaded deep cherry.
Duchess or Princess Mecklenberg,—Large, pale yellow.
Eugene Perot,—Pink; fine.
Eliza Savage,—Pale yellow, orange centre.
Gombaut,—Year red, fawn centre.
Green Rose,—New; flowers entirely green; a curiosity; $1.
Julie Mansais,—Pure white.
La Sylphide,—Rose buff, large and beautiful.
Lady Warender,—Large, white, superb.
Le Puceol,—Pale lemon yellow; very fine.
Madame Desprez,—White; very fragrant and fine.
Madame Joly,—New, extra; 75c.
Madame Belonie Willemmans,—New; is a rose of superior merit, and stands very high in Europe; it is a full white, large and fine; exquisite; $1.

MICROPHYLLAS.

Price, 50 cents each.

Alba, or Odorata Alba,—Creamy white, beautiful shining foliage, and very fragrant; blooming throughout the season.
Maria Leonida,—Pure white.

Crested,—Deep brilliant scarlet, enveloped in a rough thorny calyx; blooms several times during the season.

Seedling No. 1,—(Of Feast.) Fine rose, a climber.

PHLOXES.

Price, 18 3/4 cents each; by the dozen, $1 50.

The Phloxes are at this time the most popular of all hardy herbaceous perennials. They are very easy of culture, and being unbounded bloomers, they embellish the early autumn with a lavish profusion of the most brilliant and exquisite colors. Our collection is of the very best varieties, and we shall regularly import every choice new one. They will be ready for sale in the spring, in small pots, of a size suitable for bedding out.

Alba Glomerata,—Pure white, tall.
Anais Chauvin,—Pink, with purple eye; fine.
Arsinie,—White, delicately tinged with purple; eye large, and dark purple.
Auguste,—White, shaded with purple.
Bicolore,—Two-colored: white, with light purple eye; fine.
Blanche de Neuilly,—Pure white, very strong grower.
Candidissima Nova,—Pure white, very large heads of bloom; beautiful.
Carnea,—Light pink, in large heads.

Defecta,—Purplish crimson, with a dark eye, showy.
Decussata Alba,—Pure white.
Eclipse,—Purple, with a blush, nearly white centre.
Egyptienne,—White, tinted with purple; eye dark.
Fleur de Marie,—Pure white, with showy pink centre.
Frelinghuysen,—Purple and white, striped and mottled.
Goethe,—White striped and mottled with lilac; fine.
Granto,—White and purple striped.
Harrison,—Clear white; very large heads of bloom.
Insigii,—White, striped and mottled with lilac; eye pink.
Invincible,—Rose, shaded and striped with pink.
PAEONIES.

**TREE PAEONIES.**

These four shrubby bushes from 3 to 5 feet in height, when covered in the month of May with their large showy and beautiful flowers, are highly attractive, and even a small collection of shrubbery cannot be complete without them.

- **Paeonia Banksii,** (Chinese double blush,) large and splendid; fragrant; $1.
- **Papaveracea,** (Poppy flowered,) single, white, purple centre, large; $1.
- **Paeonia Rosea Odorata,** Rose scented; double, large and fine; $1.00.
- **Maxima Plena,** New and very rare; $3.

**HERBACEOUS PAEONIES.**

The following are herbaceous varieties from Europe and China, and are all very desirable. Some of them are quite fragrant, and bloom in succession for a long time.

- **Paeonia Albicans Plena,** Double rosy pink changing to white; hangs on a long time.
- **Humei,** Purplish rose, full and double, large and showy; one of the latest.
- **Rosea Fragrans,** Double rose colored, and fragrant; very fine.

**Price from 50 to 75 cents each.**

- **Paeonia Rubra,** Large double crimson; a magnificent variety, brilliant and of large size.
- **Whittledge,** White, centreshaded cream, in clusters, large and sweet.
- **Pottsi,**

**RHODODENDRONS.**

Price, from 75 cents to $2.

- **Arboreum,** Nepel tree.
- **Anemone,** Azaleoides.
- **Catawbienese,** Catawbas.
- **Catesbienese,** Dauricum.
- **Fragrans,** Frurigum, fl. pl.
- **Hordenae florum,** Hyalina florum.
- **Hybridum,** Hybrid.

- **Insignis,** Lacteum.
- **Martins Alba,** Nazarethicum.
- **Poncetum,** Purple.
- **Pyramidalis,** Rosatflorum.
- **Rubra florum,** Red flowered.
- **Superbum,** Superb flowered.
- **Vestalimum,** Werplanki.

AT THE
SYRACUSE NURSERIES.

SELECT DAHLIAS.

We take pleasure in offering to the public our catalogue of Dahlias, including all which have been the most successful throughout Europe the past season. Not one name is inserted in this list that is not really fine. Some of them have gained as many as fifty prices in England and France, the past year, and are warranted to answer description. They can compete with any in the United States.

Several of the sorts below enumerated are those which took the “sweepstakes” for one hundred guineas at the great Birmingham Dahlia show. “Magnificent,” “Sir F. Bathurst,” “Queen of Primroses,” and “Snowflake,” gained forty-four prizes alone, and were recommended by the judges as necessary to the smallest collection. “Elizabeth” is the finest fancy Dahlia ever raised; “Flying Dutchman” is another of the highest worth. “Lady Grenville,” “Highland Chief,” “Striata perfecta,” “Grant Thorne,” “Flora Superba,” “Mons. Affre,” and “Miss Stevens,” are among the finest ever offered, and will well repay any pains bestowed upon them; being free flowerers, of good habit, and successful prize takers. Strong and healthy plants in pots, will be ready for delivery any time in the spring. The latter part of May is the usual time for planting out. Plants carefully packed to go to any distance, and dry roots ready for exportation after the 1st of November. For many of the following we paid $3 each.

Price, in pots, in April, May and June, 25 cents; $2 a dozen; $12 50 per 100. Whole roots, in full, (which can be divided into 3 to 5,) 25 cents each; $2 a dozen; $12 to $20 per 100.

Adonis,—Cream, margined with scarlet; very fine and beautiful.
Belove de Paris,—Bluish lilac, tipped with lavender, beautiful form, and constant flower; 4 ft.
Cantillation,—Salmon, edged with white; very fine; extra.
Californian,—Fine golden yellow, salmon and white; a large, full and very handsome variety; 4 ft.
Caractacus,—Dark violet crimson; very fine.
Dupetit Thomars,—Deep yellow, beautifully edged and tipped with carmine; tipped, fine, full form; extra.
Elizabeth,—Amethyst lilac, tipped with blush, white and pink down the sides of each petal, color quite new, good form, very striking; height, 3 ft.
Fausstin 1st, or Emperor of Blacks,—Black; fine form.

Flora Superba,—Sulphur yellow, tipped with the clearest white; superior 1st class fancy flower; splendid; 3 ft.
Flying Dutchman,—Dark red, and white, beautiful showy flower; 4 ft.
Gasparine,—Rice maroon, with pure white tip, extra fine, superb fancy flower; 3 ft.
Helen,—White, edged and tipped with deep carmine; the only variety of this color in cultivation; extra fine.
Highland Chief,—Salmon, tipped with white, fine, full, raised centre, never showing an eye; 4 ft.
Isis,—Cream, tipped and margined with scarlet; fine.
Jenny Lind,—Beautiful ruby purple, tipped with peach blush, full and neat; very handsome bright colors; 4 ft.
La Belle Blonde,—White, fringed with lavender; 4 ft.

Lady Grenville.—Fine clear red, tipped with white; splendid fancy flower, unsurpassed, first class in every particular; 3 ft.

F.Empereur of Morocco.—Nearly black, edged with peach pink; a novel and splendid flower, of exquisite form; 3 ft.

Magnificent.—(Keynes.) Rosy amethyst, color pleasing and new, form most perfect, true bloomer and of superior habit; one of the finest flowers in the world; height, 4 feet.

Maid of Lorn.—Beautiful pure white, fine form and free bloomer.

Miss Blackmore.—Light purple, tipped and striped with white down the petals, exquisite form, never imperfect, extra fine; 4 ft.

Miss Jane.—Purple, tipped with white; large, bold, superior flower, good habit; 3 ft.

Miss Stevens.—Buffy pink, orange and white, one of the most unique and beautiful fancy flowers ever raised; novel in color, good form and constant; 4 feet.

Miss Vyse.—White, beautifully tipped with lilac, free form, very full, fine form; desirable.

Monseigneur Affre.—Cherry, tipped with white, very deep and of the most exquisite form, constant and fine; 4 ft.

Mrs. Shaw Lefevre.—Dark red, tipped with pure white; very showy and fine.

Nell Gwynne.—Clear primrose yellow, beautiful form and constant.

Pfarrer Reitzel.—Very dark maroon, tipped with clear white; splendid and showy; extra.

Princess Radzivil.—White, fringed with rosy purple, most exquisite form; extra.

Punch.—Bright purple, shaded with pink, tipped with flesh color; very pretty; extra.

Queen of England.—White, laced with carmine; uncertain, but when caught one of the most beautiful of its class.

Queen of the French.—Delicate sulphur, tipped with white; very fine and free.

Queen of Primroses.—The finest primrose yellow ever offered; 4 ft.

Rosetta.—Splendid pinkish lilac, most exquisite form; cupped well up in the centre; splendid.

Roal de Pontille.—Dark purple maroon, beautifully tipped with peach lilac; exquisite in every particular; shaped like a roseette.

Sir F. Bathurst.—(Keynes.) A noble crimson, darkly shaded; a close, deeply pedaled and finely constructed flower, at the top of its class; finest dark flower ever raised; height 4 feet.

Snowflake.—The best white ever offered, first rate in every respect; 4 feet.

Steen Von Meckling.—Most beautiful yellow, full, large flower, and free bloomer; exquisite.

Sublime.—Deep red, tipped with the clearest white, exquisite form, and abundant bloomer, flowers thrown well out 6 ft.

Toison d'Or.—Orange, beautiful form, large full flower, never imperfect; showy and very desirable.

Wm. Penn.—(Four or Charmois,) shaded with lilac, straw edged; novel and very pretty.

The foregoing includes many of the most perfect and choice new Dahlias. No one can go amiss in choosing from them, as they are perfect in form, and many of them novel in character. In connection with the following, they embrace every thing worthy of regard, forming a careful selection from all the new, and from the most desirable of the older sorts. They are all perfectly double.

Acantha.—Blush white; abundant bloomer.

Adelaide.—Brilliant violet; extra fine.

Amen Ptysta.—Light purple, marked and tipped with white.

Athlete.—Beautiful lilac; very fine.

Browning.—Shaded crimson, full and perfect.

Boxa.—Bright scarlet, good form.

Goule de Peau.—Rosy scarlet, changing to lilac.

Cardinal Peretti.—Clear red, magnificent and large; one of the finest.

Charles Xf.—Plum color, distinctly tipped with white.

Duke of York.—Rosy scarlet; free bloomer.

Eugenia.—Light yellow, edged with violet.

Eugenia.—(Schmitz.) Primrose, tipped with purple.

Felix.—Dark rose; cara fine.

Florence Bombey.—Golden yellow, tipped with white, cupped, good size, and constant bloomer.

Fran Reit. or Jr. Ruxing.—Fancy deep crimson, shaded with white.

Furst Wolkensky.—Rich dark crimson, monstrous size, and good shape.

Gaiety.—Yellow, with red edge, a bold and striking flower, constant and fine.

Grant Thorburn.—Rosy lilac, unsurpassed, constant and superb; good habit.

Grenadier.—Deep ruby crimson, very full and superb; noble and majestic habits; extra fine.

Grace Darling.—Rosy salmon, very fine.

Huilette.—Beautiful dark crimson maroon.

Harlequin.—White, with a deep margin of brilliant scarlet; fine.

Hero of the West.—Rosy crimson; fine.

Hero of Stonechenge.—Dark crimson; very large and fine.

Herr Hino.—Illuminator.—White, tipped with scarlet, fancy.

Indispensable White.—Blush white; large fancy flower.

Ithuriel.—Bronze, shaded with pink.

Lady Dowager Cooper.—Peach blossoms pink, cupped and fine.

Lady of the Lake.—Blush white, edged with rose carmine.

Leibich Vonリストenthal.—Primrose, tipped with white; delicate and beautiful.

Louis de France.—White; finest of its class.

Madam Zahler.—Blush, tipped with amber, large and fine.

Marchioness of Corwallis.—Blush, fine form, extra.

Master George Clayton.—Pure white, tipped with crimson.

Melon Adam.—Fancy cream and rose; large showy flower.

Metropolitan Queen.—Lilac, laced with lavender.

Miss Chaplin.—Pink, veined and tipped with crimson, 4 ft.

Model.—Deep scarlet; exquisite form.

Mount Blanc.—Pure white, large and fine; 6 ft.

Mrs. Edwards.—Pinkish white, tipped with bright gold.

Ociflet Partia.—Orange and red striped, unique flower; 4 ft.

Pactolus.—Clear yellow, tipped with scarlet; fine.

GREEN HOUSE PLANTS.

ACACIA.—

Julibrissen,—Persian silk tree, 23
Linifolia,— 30
Lougheana,—Golden haired; beautiful, 35
Puniglosterus,—Yellow flowered, 35
ABELIA Triflora,—New, 35
APEHLANDRA cristata,—New, 30
ABUTILON.—
Bedfordianum,—Pale yellow, striped brown, with large leaves, 30
Nageliana,—Stripped, beautiful, 35
Venosum,—Orange, veined with crimson, beautiful, 38
ADAMIA Versicolor,—New, 50
ACAPANTHUS.—
Umbellata,—Blue umbel flowered, 25
Variegata,—Variegaed flowered, 25
ALOE.—
Arborescens,—Tree, 23
Folii variegata,—Variegated leaves, 25
Lingua,—Tongued, 25
Variegata,—Partridge breast, 25
ALOYSIA Citriodora, or Verbena—
Tryphilla,—Lemon scented verbena, 35
AMANITA Intea,—Yellow, pretty flowers, 25
AKU NDO donum versicolor,—Striped red, 35
AMARYLLIS,—
Alissiana,— 75 to 175
Atilla,— 20 to 250
Belladonna major,— 75 to 100
Crocea,— 38
Fumosissima,—Dark crimson, 93 to 250
Johnsonii,— 1 to 200
Vittata,—Superb ribbon striped, 30
ACHIMENES.—
Coccinea rosin,—Cherry red, 35
Grandiflora,—Beautiful red, 35
Liebmannii,—Rosy crimson, 35
Longiflora,—Light purple, 35
Pilosus,—Rose colored, 35
Patens,—Fine blue, 35
Pedunculata,—Superb spotted, 35
Picota,—Splendid red and yellow, 35
The Achimenes are a beautiful tribe of dwarf plants, and well adapted to windows; their culture is simple, requiring only rich mold and plenty of water. Plant early, and shift several times from small to larger pots, as the ball of earth becomes filled with roots.

Alba,—White, 35
Capella,—Fine rose, 50
Danielsiana,—Clear red, 50
Defecta,—New, 50
Decora,—New, 50
Gillinghamii,—Large lave, 50
Hirstra Superba,—Fine crimson, 35
Indica coccinea,—Red flowering, 35
Lateritia,—Dart, salmon rose, fine, 35
Lilacina,—Pure lilac, 50
Londoniensis,—New, 50
Phraea,—Rich purple, 50
Parpura plena,—Double purple, 50
Smillia,—Fine blue, 50
Splendens,—Salmon rose, fine, 50
Sineus,—True golden yellow, 50
BARBILIA flavina,—New, 50
BARONIA alba,—Round leaves and deep pink flowers, 50
BASILICA tuberosa,—Madeira vine, pretty white flowers, and shining leaves, 25
BESPERRIS aquilinum,— 25
BIGONIA Jasminoides,—Jasmine leaved Trumpet flower, 30
BOUVARDIA spectabilis,—Beautiful scarlet Bower, 35
BRACHYSEMA platypetala,—New Holland climber, 50
BUCCELLA violacea,— 25
CALACALIA.—
Artificialia,—Jointed, 25
Glaucosa,—Glaucous leaved, 25
CALA achillarum,—Tily of the Nile, 35
CALYCANTHUS praecox,—Flowers about Christmas, 65
CEANOTHUS.—
Ovatus,—Large spikes of small flowers, 50
Thysifolius,—Deep blue flowers, 50
CORONILLA glauca,—Yellow flowers, very fragrant, 50
CLEFODENDRON.—
Volubilis,— 50
Sinuosa,— 50
CLANTHUS praecox,—Magandef, with bright crimson flowers, 50
CLITOREA ternatea,— 50
CALCEOLARIA,—
Bicolor,—White and straw colored, 25
Metazoa,—Dark red, 25
Rubra,—Crimson, 25
Smillia,—Red and yellow, 30
CAMPANULA.—
Pyramidalis,—Pyramidal Canterbury bells, 25
CANTUA bicornis,— 50

CACTI.—

CEREUS.—
Filamentosa,—Thready, 35
Flagelliformis,—Creeping, 35
Grandiflorus,—Night blooming, 35
Hexagonus,—Six angled, 50
Malviodea,—Mollissima, 35
Monnularia,—Many angled, 50
Pentagonus,—Five angled, 50
Serpenrns,—Climbing, 35
Speciosissimus,—Most splendid, 35
Selenis,—Hair monkey, 100
Smillia,—Smutts, 25
Triangularis,—Great three-sided, 25
ECHINOCACTUS.—
Discolor,—Two colored, 30
Simplex,— 35
EPiphyllum.—
Ackermaus,——Ackermaus, 35
Jenkinsonii,—Jenkinsonii, 35
Marginatum,—Margined, 75
Truncatatum,—Truncated, 35
Truncatatum violaceum,—White, 35
edged with rose purple, 50
MAMMILLARIA.—
Aurea,—Golden, 50
Coronita,—Crowned, 35
Cruciformis,—Cruiform, 35
Densa,—Close-headed, 35
Gracilis,—Slender, 35
Multiplex,—Many crowned, 35
Maydly,—Maidly, 35
Prolifera,—Proliferous, 35
Wildiana,—Wildiana, 35

Rudbeckiae,—Starry, 35
MELOCACTUS.—
Comunis,—Turks cap, 35
Latispinus,—Broadspined, 35
**CAMILIAS 1st CLASS.**

Flowers imbricated, Alba plicata, the type.

Price from $1 to $2 50, according to variety.

The following list consists of the choicest Camilias in cultivation, and amongst them, the two fine new varieties of 12. A. P. Wilder, and the three new varieties of Mrs. John Priestley, of Baltimore, Md. They are all correctly described, so that any one may choose to make his selection with confidence.

Camilla one year increased low by the dozen, to the trade, or others.

Alba plicata.—Pure white, fully double, form perfect, petal broad, round and deep; has no superior as a white.

Alba imbricata.—Pure white, form perfect, edge of each petal fringed.

Alba Nova.—(Dunlap's)—Pure white, form perfect, petals large, round and deep; a superb flower.

Amabile.—(Smith's)—Carmine, shading to the centre with delicate rose, sometimes white spotted; form perfect, petals round and reflexed.

Bimney.—(Smith's)—Rose red, shading to the centre to clear light rose; often delicately striped with white; form perfect, petals numerous, deep and slightly pointed.

Caroline.—(Smith's)—Rose; form perfect, petals numerous, narrow and slightly pointed.

Candidissima.—Snow white; form perfect, often angular; petals large; round and of great depth; will compare with Alba plicata.

Coventina.—Light rose, dotted with white; form perfect, petals round and finely arranged.

Duchess d'Orleans.—White, profusely dotted and striped with rose; petals finely formed.

Elata.—Crimson, dotted with white; form perfect, petals often reflexed.

Eximia.—Dark salmon; form compact and slightly reflexed; petals numerous and creped.

Feastii.—White, striped with delicate rose; petals very large, broad and of fine form.

Ford.—Delicate rose; form perfect; petals numerous and finely arranged; a most superb flower.

Fulgens.—Vivid crimson.

Hempslie.—Clear carmine; form perfect, petals round, numerous, and of great depth.

Henry Fawcett.—Delicate shaded rose; form perfect; petals numerous, capped and beautifully arranged; a superb flower.

GERANIUMS, OR PELARGONIUMS.

Price, from 25 cents to $1.00.

We have endeavored to procure all the choicest flowering plants, including Mr. Beck's prize varieties. No plants are more ornamental. The following list comprises all the best in America, both for the delicacy of their tints, and for the beauty of their flowers. They enliven the Green House from June to October, and, added to a collection of Fuchsias, will render a conservatory a constant and brilliant show during the whole season. They will also bloom finely when hedged out.

Those marked thus (*) are the newest varieties.

Splendens.—Double red Oteander. 25
CATALOGUE
OF
HOT HOUSE AND GREEN HOUSE PLANTS,
CAMILLAS, FUCHSIAS, GERANIUMS, LILIES, VERBENAS, &c.

WITH
A CHOICE LIST OF
BEDDING OUT PLANTS & BULBOUS ROOTS,
CULTIVATED AND FOR SALE
AT THE
SYRACUSE NURSERIES & GREEN HOUSES.

We present in this part of our Catalogue, descriptions of many of the productions of our Green Houses, to which we invite the attention of our friends, fully confident of our ability to please them, because our articles are all of recent growth, and not the long accumulating remains of an old concern. Among those to which we would particularly refer, and of which we have a collection of the highest excellence, are Achimenes, Calceolarias, Cinerarias, Fuchsias, Geraniums, (Pelargoniums,) Lilies, and Verbenas. All of these, as well as any other of the productions pertaining to our Green Houses, will be sold as low as they can be purchased elsewhere in the United States, and in many cases our prices will be found to be lower than in any other catalogue.

Purchasers, and not purchasers only, but all others who may visit the establishment, will receive every attention from the proprietors in person, who will use every means to render their visit agreeable, and impart freely all information that may be desired of them.

Garlands, Wreaths, and Bouquets, of rare and beautiful flowers, arranged in the most tasteful manner, will be furnished at any time, and for all occasions, in summer or winter, to our own citizens, or to those from abroad. They will always be so packed as to be forwarded with perfect safety to any reasonable distance.

Or Ornamental Trees, Shrubs, Herbaceous Plants, Evergreens, &c., we have an extensive assortment, as will be seen by reference to the other departments of this catalogue.

Twenty per cent discount from our catalogue prices will be made to all purchasers of Green House plants, whose orders shall amount to ten dollars and over.
HOT HOUSE PLANTS.

VERONICA,—
Andersonii.—New and fine, 50
Speciosa.—Beautiful, 49
Lydia.—Lyndley's, 40
Salicifolia.—Willow leaved, 30

SELECT VERBENAS.

The Verbena is decidedly one of the richest acquisitions to the flower garden; it blooms in great profusion during the Summer and Autumn, continuing until the ground becomes hard frozen. It looks bright and vigorous always, not being affected by the sudden changes of temperature or moisture. As it is a trailing plant, covering the ground closely, it is ideally adapted for grouping, or for mounds. The following, selected from nearly 100 sorts, are of a trailing habit, free bloomers, and good trussers. They comprise all of the best and most rare, as well as the latest importations.

**Price, from 12 1/2 to 25 cents.**

(Available by the dozen or 100.)

Adel, Rosy lilac, light centre.

A. aurea.—Blood red crimson, centro maroon.

Ariadne.—Creamy buff, pencilled with cherry.

Beauty of 13, New and fine.

Beauty Supreme.—Fine peach pink, fine eye; beautiful, 25

Boule de Feu.—Deep brilliant scarlet, small flowers.

Camelion.—White and pink in the same trash; changes color.

Cestina.—Light blue; very pretty.

Striped Perfection, or striped Striata.—Small flowers, distinctly striped with pink; petals starry, variegated like Phlox Van Houton.

**Seeding No. 1.—** (Our own)—Pure white; large flower, like St. Margaret; true large, and a fine bloomer.

**No 2.—** (Our own)—Splendid white, similar to No. 1; but after the true is fully expanded, changes to beautiful light pink, becoming more dark until they drop off.

**No 3.—** (Our own)—Beautiful soft pink, most pleasing; different shade from any verbena.

These three seedlings remain in flower, and retain their perfection, a great length of time.

**White Perfection.—** Best white out.

**Wilson’s Scarlet.—** Fine, good scarlet.

**VIOLAS, or Pansies,—** Fine collection, 13

**VIOLETS,—** Neapolitan,—Very fine, 25

**VIBURNUM,—** Thun,—Laurustinus, 50

**Variiegatum,—** Variegated, 50

**Odoratissimum,—** Sweet scented, 60

**Tweedia,—** Splendid, 60

**WESTRINGIA,—** Rosmarinus,—Rosemary leaved, 50

**Longifolia,—** Long leaved, 50

**YUCCA,—** Atropurpurea,—Adam’s needle, 50

**Filotenoua,—** Thorns, 50

**Flicaria,—** Dipsacus, 50

**Gloriosa,—** Splendid flowering, 50

**ZAUSCHNEIKI,—** California,—Beautiful, Californian, 50

With a great many other fine plants of recent introduction, which will be disposed of at the lowest rates.

---

**PLANTS FOR BEDDING OUT.**

All the following beautiful and popular plants are cultivated extensively, and furnished by us in the Spring in small pots, in proper condition, for planting into the border.

**BEAUTIFUL CLIMBERS.**

**CALESTEGIA PUPESCENS—** This is perfectly hardy. Mr. Watson, Nurseryman, of Plymouth, thus describes it: “Trained to a single pillar, sylvan festoon, it is a very striking and beautiful object from June until frost, during which time it is covered with a profusion of large, double, delicate rose colored flowers. It is very ornamental, planted in patches like Verbena; makes an admirable screen; and is very effective in plantations, belts or shrubberies, trailing profusely along the surface, and running along the lower branches of the trees in a very pietrosoke manner. It will thrive in any common garden soil, and needs the most simple culture.” Price $2.75 cents each; or $3.50 per doz.

**COBRA Scandens—** Large, purple, bell-shaped flowers, 50

**CHINESE PANSIES—** 50

**GRECIAN PERIPLOCA—** 50

**GLYCINES OR WINTARIES—** 50

**HONEY Suckle—** 25 to 70

**EUONYMUS S. SCANDENS—** 50

**NURSERYMANIAE—** 50

**MOERANDIA ALFA—** 53

**MOERANDIA FILODIORA—** 25

A large deduction made to the trade, by the quantity.
BULBOUS ROOTS.

Imported annually from Holland.

The following choice collection of Bulbs has been selected with especial reference to their fine blooming habits, brilliant colors, and exquisite fragrance. Their quality cannot be surpassed. They are remarkably superior to those refuse roots sent out annually for public sale in our large cities. All who wish to obtain one of the best assortments will find it very much to their satisfaction to avail themselves of the opportunity which, by importation or culture, we annually offer them.

These Bulbs answer for forcing in the winter, for the parlor, as well as for planting out in the garden. They are always warranted to be sound, and true to name and color; and will be sold as low as they can be obtained elsewhere, and much lower than New York prices generally.

Directions.—The preferable season for planting out bulbs is from October until the freezing of the ground. The depth that they should be buried varies with varieties. Hyacinths, Amaryllis, and large Lilies, four inches; Crown Imperials, and Narcissus, five inches; Tulips, Double Narcissus, and Jonquils, three inches; Crocus, Gladiolus, and Snowdrops, two inches; always measuring from the top of the bulb. Every other year, Hyacinths, Tulips, &c. should be taken up and separated. The time is about one month after the bloom is completely gone, when the plants assume a yellowish appearance. Cut off the stem within one inch of the bulb, but leave the fibres on, then spread them in an airy room to dry for several weeks; after which they should be laid away in dry sand, or wrapped closely in paper, until the planting season returns.

AMARYLLIS.

Large strong Bulbs.

Amaryllis.—Most splendid red, very beautiful, $1 25

Auricula, or Lily of the Palace.—Crimson, shaded with lively green, very splendid and showy, 2 50

Belladonna major.—Large pale violet and white, very showy, 75

Formosissima.—Rich, velvety crimson, 25

Johnsoniana, or Johnson’s superb.—Crimson, striped with white, quite showy, with very large heads of bloom, 1 25

CROCUS.

Price per 100, $1 50.

Antumnal flowering.—Very fine and beautiful 30

Cloth of Gold.—Yellow and brown, 30

David Rizzio.—Purple, 30

Queen Victoria.—Large white, 30

Scotch striped.—White striped with purple, 25

Yellow, White, Purple, Blue, and Violet-striped, large, 25 cents per dozen.

GLADIOLUS.

Blandus rosea.—Each, 15c, Doz. 1 50

Communis.—Purple, 8 75

Cardinalis.—Beautiful scarlet, 15 1 50

Cardinalis rosea.—Rose flowered, 13 1 25

Floribundus.—Blush pink, 15 1 50

fragrans recurvus.—50 4 90

Gandavanus.—Scarlet and yellow, 40 3 50

Multiflorus.—Fresh colored, 18 2 00

Psittacinus.—Parrot-like, 8 75

HYACINTHS.

DOUBLE DARK BLUE.—

Blen Fance.—Each, 15c, Doz. 1 50

Bloksbergum.—Extra fine, superb, 50

DOUBLE DARK BLUE.—

La bien aimee.—13

Lord Wellington.—Very fine, 15

Prins Van Sype Weimar,—Large and dark, 25

Sausoncel.—20

Tubalcain.—13

DOUBLE PORCELAIN BLUE.—

Alta mode.—Extra fine, 15

Charles Fox.—Superb, 40

Grootvoest Nicholas.—18

Rabbit Brilliante.—22

Maro Bozar.—15

Signon de kryphon.—Large, 10

Paarboote.—Extra fine, light, 25

Prolifica monstrosa.—Very large, extra, 1 00

DOUBLE RED, AND ROSY.—

Acteur.—13

Bettie.—18

Boquet Royal.—18

Boquet teutre.—Fine dark crimson, 15

Comtesse de la Coste.—Rose, extra, 15

Flos saunnicus.—Dark, green tips, 15

France.—15

Gondheurs.—16

Grootvoest.—Rose, extra fine, 13

Hugo Grolius.—14

Lord Wellington.—15

Madam Zoutman.—Red, green tips, 16

Nederlandt Wer.—38

Panorama.—15
